EXECUTIVE AUTHORITY STATEMENT

It is with great honour and a profound sense of responsibility that I present the Annual Performance Plan (APP) for the Eastern Cape Department of Health for the fiscal year 2024/25. This document encapsulates our collective vision, strategies, and objectives aimed at improving healthcare delivery and outcomes across our province.

As we about to end our 6th administration and in the same vain celebrate 30 years of our democracy, we are reminded of the words of the President of the African National Congress Oliver Tambo when he said “Comrades, you might think that it is very difficult to wage a liberation struggle. Wait until you are in power. I might be dead by then. At that stage, you will realise that it is actually more difficult to keep the power than to wage a liberation war. People will be expecting a lot of services from you. You will have to satisfy the various demands of the masses of our people”

These word encouraged us as leaders of the democratic government to work tirelessly and diligently knowing that our people are expecting us to deliver on the promises of our Freedom Charter without fail. It is imperative therefore to reflect on the progress we have made and the challenges that lie ahead. The few past years has been marked by unprecedented global challenges, from the enduring impacts of the COVID-19 pandemic to the persistent socio-economic disparities that continue to affect our communities. Despite these obstacles, the Eastern Cape Department of Health remains steadfast in its commitment to providing equitable, accessible, and high-quality healthcare services to all residents.

The passing of National Health Insurance Bill is a big feature and a huge achievement towards total emancipation and improved quality healthcare. Central to the NHI is our resolve to uphold the principles of inclusivity, ensuring that every citizen, regardless of background or circumstance, has access to the healthcare they need and deserve. Through a comprehensive approach that encompasses preventive care, health promotion, and disease management. It is our mission as Eastern cape Department of Health to work tirelessly to address the root causes of ill-health and empower individuals and communities to take charge of their well-being.

This APP serves as a roadmap for achieving our goals, outlining key priorities, targets, and initiatives for the year ahead. From expanding access to primary care services in underserved areas to strengthening our response to emerging public health threats, each objective is rooted in evidence-based practices and informed by the needs of our population.

Furthermore, we recognize that the success of our endeavors depends on the dedication and expertise of our healthcare workforce. As such, we remain committed to investing in their professional development, providing the necessary resources and support to enable them to deliver services of the highest caliber.

I would be remiss if I did not express my sincere gratitude to all those who have contributed to the development of this plan, including our dedicated staff, partner organizations, and community stakeholders. Your unwavering commitment and collaboration are essential to our collective success.

In closing, I am confident that with unity, determination, and innovation, we will overcome the challenges that lie ahead and continue to make meaningful strides towards our vision of a healthier, more resilient Eastern Cape. Together, let us embark on this journey with renewed vigor and a steadfast commitment to the well-being of all our citizens.

Yours in quality healthcare

A handwritten signature in blue ink, appearing to read 'N. Capa', is written over a horizontal line.

Hon. N. Capa, MPL

Member of the Executive Council

30 July 2024

STATEMENT BY THE HEAD AND ACCOUNTING OFFICER OF THE DEPARTMENT

This Annual Performance Plan is developed as the last segment towards achieving the policy priorities of the sixth administration. It allows us to reflect on the dreams and aspirations that we and our stakeholders had at the start of the sixth administration. An important commitment was undertaken at the start of the administration to strive to deliver the promise of providing quality health services to the people of the Province, informed by the National Development Plan (NDP), Medium-Term Strategic Framework (MTSF), Provincial Development Plan (PDP) and Provincial -Medium Strategic Framework (PMTSF).

As we reflect in the past four years, we are reminded of an unprecedented event of our lifetime, the global Covid-19 pandemic and its negative impact on health care. The gains made in the health sector towards achieving the Sustainable Development Goals (SDG) were reversed by the Covid-19 pandemic. However the Department developed and is implementing the Turn Around Strategy towards the renewal of the departmental programme of action. A need to rationalise the service delivery platform to improve effectiveness and efficiency within the sector has been identified and post Covid-19 lessons in the implementation of hub and spoke model is undertaken. Rehabilitation Centres of Excellence are also implemented through the hub and spoke model. The Departmental Task Team (DTT) - organized labour with management, supported by the Office of the Premier (OTP) and Department of Public Service and Administration (DPSA) experts- kicked off the service delivery review and realignment to the National Health Insurance (NHI) and District Development Model (DDM).

The Department has stemmed the haemorrhage of funds from the budget through the upfront, lump sum medico-legal settlements by launching two critical legal defence strategies - the Stay of Writs and Public Health Defence medico-legal strategies. The Department thus spent less than R500m total expenditure across the last two financial years since the implementation of the health turnaround strategy. This is significantly less than the projected two billion rand (R2 bil) outflow to settle cases on the court rolls for these years, had the coordinated legal defences not been mounted.

The National Development Plan 2030 (NDP 2030) has envisaged that in 2030, South Africa has a life expectancy rate of at least 70 years for men and women. The NDP further acknowledges that there has been a significant shift in equity, efficiency, effectiveness, and quality of health care provision. The Department is working on ensuring the healthy communities and better health outcomes through the coordinated approach in service delivery. The Department has embraced the UNAIDS 959595 Human Immuno-deficiency Virus (HIV) and Tuberculosis (TB) strategy which means 95% of all people with HIV know their status, 95% of all people with diagnosed HIV infection receive sustained treatment, and 95% of all people receiving treatment will have viral load suppression.

The Department is committed to the control of Non Communicable Diseases through adoption of an integrated, person-centred approach, strengthen our health systems for NCDs, establish coordinated and cohesive

engagements with stakeholders at all levels of care and promote the introduction and strengthening of care cascades for hypertension and diabetes. With Regards to mental health services, the Department is experiencing high re-admission rates as patients default treatment and are not fully re-integrated into the society. The province intends to strengthen community mental health services with a focus on improving skills and knowledge of the existing staff, expanding community based services and appointing district specialist mental health teams. Hospitals interventions are aimed at strengthening 72 hours observations and provision of acute mental health beds,

Despite the continuing challenges on multiple fronts, especially the constrained fiscal environment, natural disasters and increasing medico legal liability, the department is resolute on delivering on its constitutional mandate as encapsulated in section 27 of the Constitution of the Republic of South Africa (Act 108, 1996). The following priorities find expression in the department's APP 2024/25 as the Department envisions the way in which it provides health and care to the people it serves:

- Implementing the digitalisation, e-health strategy, new technologies and rolling out the HMS², Pharmacy Management and Emergency Medical Services call taking systems.
- Service delivery optimisation utilising the hub and spoke model to ensure efficiency and effective use of the available resources across the health value chain.
- Interventions to promote financial well-being of the Department by obtaining a clean audit, introducing cost-containment measures and efficiencies, expanding revenue generating initiatives and focusing on pro-active and preventative maintenance of health technology and equipment.
- Stemming the outflow of funds through medico-legal settlements and an integrated approach to managing and preventing medico-legal claims.
- Implementation of Pandemic Prevention Preparedness and Response by establishing Public Health Emergency Operations Centre (PHEOC) and intensify strategies for public health surveillance.
- Strengthening research activities through provincial research agenda and coordinate clinical research platform to improve health outcomes and generate new knowledge to inform policy and decision making.
- Finalisation and implementation of the Human Resources for Health (HRH) strategy as outlined in the department's 5-year strategy and the revised service delivery platform. The Department will also finalise the resultant staff migration plan that will ensure that staff are placed where they are most needed, in line with their skills and competencies.

Lastly, I implore the stakeholders of the Department to work together with us to accomplish better health outcomes for all and successful implementation of National Health Insurance towards Universal Health Coverage.

Ms M. Nokwe

Acting HOD for Health

30 July 2024

OFFICIAL SIGN-OFF OF THE ANNUAL PERFORMANCE PLAN 2024/25

It is hereby certified that this Annual Performance Plan:

Was developed by the management of the Eastern Cape Department of Health under the guidance of MEC for Health, Hon. N. Capa, MPL, takes into account all the relevant policies, legislations, and other mandates for which the Eastern Cape Province is responsible. Accurately reflects the outcomes and outputs which the Eastern Cape Department of Health will endeavour to achieve over the period 2024/ 25 financial year.

Ms. N. Maseko

Acting Programme Manager: 1, 6, & 8

PART A

OUR MANDATE

Province of the
EASTERN CAPE
HEALTH

PART A - OUR MANDATE

I. HEALTH SECTOR POLICIES AND STRATEGIES

There are no new updates on the relevant legislatives and policy mandate

Constitutional Mandate

In terms of the Constitutional provisions, the Department is guided by the following sections and schedules, among others:

The Constitution of the Republic of South Africa, 1996, places obligations on the state to progressively realize socio-economic rights, including access to (*affordable and quality*) health care.

Schedule 4 of the Constitution reflects health services as a concurrent national and provincial legislative competence.

Section 9 of the Constitution states that everyone has the right to equality, including access to health care services. This means that individuals should not be unfairly excluded in the provision of health care. People also have the right to access information if it is required for the exercise or protection of a right. This may arise in relation to accessing one's own medical records from a health facility for the purposes of lodging a complaint or for giving consent for medical treatment.

This right also enables people to exercise their autonomy in decisions related to their own health, an important part of the right to human dignity and bodily integrity in terms of sections 9 and 12 of the Constitutions respectively.

Section 27 of the Constitution states as follows: with regards to health care, food, water, and social security:

- (1) Everyone has the right to have access to:
 - (a) Health care services, including reproductive health care.
 - (b) Sufficient food and water; and
 - (c) Social security, including, if they are unable to support themselves and their dependents, appropriate social assistance.
- (2) The state must take reasonable legislative and other measures, within its available resources, to achieve the progressive realization of each of these rights; and
- (3) No one may be refused emergency medical treatment.

Section 28 of the Constitution provides that every child has the right to 'basic nutrition, shelter, basic health care services and social services.

2. LEGISLATIONS FALLING UNDER THE DEPARTMENT OF HEALTH'S PORTFOLIO

National Health Act, 2003 (Act No. 61 of 2003)

Provides a framework for a structured health system within the Republic, taking into account the obligations imposed by the Constitution and other laws on the national, provincial, and local governments with regard to health services. The objectives of the National Health Act (NHA) are to: unite the various elements of the national health system in a common goal to actively promote and improve the national health system in South Africa; provide for a system of co-operative governance and management of health services, within national guidelines, norms and standards, in which each province, municipality and health district must deliver quality health care services; establish a health system based on decentralized management, principles of equity, efficiency, sound governance, internationally recognized standards of research and a spirit of enquiry and advocacy which encourage participation; promote a spirit of co-operation and shared responsibility among public and private health professionals and providers and other relevant sectors within the context of national, provincial and district health plans; and create the foundation of the health care system, and understood alongside other laws and policies which relate to health in South Africa.

Medicines and Related Substances Act, 1965 (Act No. 101 of 1965) - Provides for the registration of medicines and other medicinal products to ensure their safety, quality and efficacy, and also provides for transparency in the pricing of medicines.

Hazardous Substances Act, 1973 (Act No. 15 of 1973) - Provides for the control of hazardous substances, in particular those emitting radiation.

Occupational Diseases in Mines and Works Act, 1973 (Act No. 78 of 1973) - Provides for medical examinations on persons suspected of having contracted occupational diseases, especially in mines, and for compensation in respect of those diseases.

Pharmacy Act, 1974 (Act No. 53 of 1974) - Provides for the regulation of the pharmacy profession, including community service by pharmacists.

Health Professions Act, 1974 (Act No. 56 of 1974) - Provides for the regulation of health professions, in particular medical practitioners, dentists, psychologists and other related health professions, including community service by these professionals.

Dental Technicians Act, 1979 (Act No. 19 of 1979) - Provides for the regulation of dental technicians and for the establishment of a council to regulate the profession.

Allied Health Professions Act, 1982 (Act No. 63 of 1982) - Provides for the regulation of health practitioners such as chiropractors, homeopaths, etc., and for the establishment of a council to regulate these professions.

SA Medical Research Council Act, 1991 (Act No. 58 of 1991) - Provides for the establishment of the South African Medical Research Council and its role in relation to health research.

Academic Health Centres Act, 86 of 1993 - Provides for the establishment, management, and operation of academic health centres.

Choice on Termination of Pregnancy Act, 1996 (Act No. 92 of 1996) - Provides a legal framework for the termination of pregnancies based on choice under certain circumstances.

Sterilization Act, 1998 (Act No. 44 of 1998) - Provides a legal framework for sterilizations, including for persons with mental health challenges.

Medical Schemes Act, 1998 (Act No. 131 of 1998) - Provides for the regulation of the medical schemes industry to ensure consonance with national health objectives.

Council for Medical Schemes Levy Act, 2000 (Act No. 58 of 2000) - Provides a legal framework for the Council to charge medical schemes certain fees.

Tobacco Products Control Amendment Act, 1999 (Act No. 12 of 1999) - Provides for the control of tobacco products, prohibition of smoking in public places and advertisements of tobacco products, as well as the sponsoring of events by the tobacco industry.

Mental Health Care 2002 (Act No. 17 of 2002) - Provides a legal framework for mental health in the Republic and in particular the admission and discharge of mental health patients in mental health institutions with an emphasis on human rights for mentally ill patients.

National Health Laboratory Service Act, 2000 (Act No. 37 of 2000) - Provides for a statutory body that offers laboratory services to the public health sector.

Nursing Act, 2005 (Act No. 33 of 2005) - Provides for the regulation of the nursing profession.

Traditional Health Practitioners Act, 2007 (Act No. 22 of 2007) - Provides for the establishment of the Interim Traditional Health Practitioners Council, and registration, training and practices of traditional health practitioners in the Republic.

Foodstuffs, Cosmetics and Disinfectants Act, 1972 (Act No. 54 of 1972) - Provides for the regulation of foodstuffs, cosmetics, and disinfectants, in particular quality standards that must be complied with by manufacturers, as well as the importation and exportation of these items.

Other legislation applicable to the Department:

Criminal Procedure Act, 1977 (Act No. 51 of 1977), Sections 212 4(a) and 212 8(a) - Provides for establishing the cause of non-natural deaths.

Children's Act, 2005 (Act No. 38 of 2005) - The Act gives effect to certain rights of children as contained in the Constitution; to set out principles relating to the care and protection of children, to define parental responsibilities and rights, to make further provision regarding children's court.

Occupational Health and Safety Act, 1993 (Act No. 85 of 1993) - Provides for the requirements that employers must comply with in order to create a safe working environment for employees in the workplace.

Compensation for Occupational Injuries and Diseases Act, 1993 (Act No. 130 of 1993) - Provides for compensation for disablement caused by occupational injuries or diseases sustained or contracted by employees in the course of their employment, and for death resulting from such injuries or disease.

National Roads Traffic Act, 1996 (Act No. 93 of 1996) - Provides for the testing and analysis of drunk drivers.

Employment Equity Act, 1998 (Act No. 55 of 1998) - Provides for the measures that must be put into operation in the workplace in order to eliminate discrimination and promote affirmative action.

State Information Technology Act, 1998 (Act No. 88 of 1998) - Provides for the creation and administration of an institution responsible for the state's information technology system.

Skills Development Act, 1998 (Act No. 97 of 1998) - Provides for the measures that employers are required to take to improve the levels of skills of employees in workplaces.

Public Finance Management Act, 1999 (Act No. 1 of 1999) - Provides for the administration of state funds by functionaries, their responsibilities and incidental matters.

Promotion of Access to Information Act, 2000 (Act No. 2 of 2000) - Amplifies the constitutional provision pertaining to accessing information under the control of various bodies.

Promotion of Administrative Justice Act, 2000 (Act No. 3 of 2000) - Amplifies the constitutional provisions pertaining to administrative law by codifying it.

Promotion of Equality and the Prevention of Unfair Discrimination Act, 2000 (Act No. 4 of 2000) - Provides for the further amplification of the constitutional principles of equality and elimination of unfair discrimination.

Division of Revenue Act, (Act No. 7 of 2003) - Provides for the manner in which revenue generated may be disbursed.

Broad-Based Black Economic Empowerment Act, 2003 (Act No. 53 of 2003) - Provides for the promotion of black economic empowerment in the manner that the state awards contracts for services to be rendered, and incidental matters.

Labour Relations Act, 1995 (Act No. 66 of 1995) - Establishes a framework to regulate key aspects of relationship between employer and employee at individual and collective level.

Basic Conditions of Employment Act, 1997 (Act No. 75 of 1997) - Prescribes the basic or minimum conditions of employment that an employer must provide for employees covered by the Act.

Disaster Management Act 2002 (No. 57 of 2002) – establish framework to prevent, reduce the risk of disasters, mitigating the severity of disaster, emergency preparedness, rapid and effective response to disasters and post – disaster recovery through establishment of National, Provincial and municipal disaster management centre.

UPDATES ON HEALTH SECTOR POLICIES AND STRATEGIES

National Health Insurance (NHI) Bill

The National health insurance bill was passed by both houses of parliament (National Assembly and National Council of Provinces) in 2023. The phased implementation of National Health Insurance (NHI) is intended to ensure integrated health financing mechanisms that draw on the capacity of the public and private sectors to the benefit of all South Africans. The policy objective of NHI is to ensure that everyone has access to appropriate, efficient, affordable, and quality health services.

The bill will improve the operations of the department through Ideal Clinic Realisation and Maintenance (ICRM) model which will improve our infrastructure and quality improvement services and the enrolment of Contracting Units of Primary Health Care (PHC) which is at the initiation stage of the Re-engineering of Primary Health Care to improve health outcomes through Integrated School Health Programme (ISHP), Ward-Based PHC Outreach Teams, District Clinical Specialist Teams (DCSTs) and General Practitioners (GP) contracting services.

National Development Plan (NDP): Vision 2030

South African Government is entering its last 5 year cycle towards the 2030 vision. The overarching goal that measures impact is “Average male and female life expectancy at birth increased to at least 70 years”. The NDP goals measure health outcomes, requiring the health system to reduce premature mortality and morbidity. Also tracking the health system that essentially measure inputs and processes to derive outcomes.

Fig 1: National Development Plan

Sustainable Development Goals

The Department is committed in implementing Goal 3 of the Sustainable Development Goals (2030) - to ensure healthy lives and promote well-being for all at all ages, particularly focussing on the following:

- Reduction of the maternal mortality ratio to less than 70 per 100,000 live births.
- End preventable deaths of new-borns and children under 5 years of age, aiming to reduce neonatal mortality and under-5 mortality.
- Reduce the impact of the epidemics of HIV/AIDS, Tuberculosis, Malaria and neglected tropical diseases and combat hepatitis, water-borne diseases, and other communicable diseases like COVID-19.
- Reduce premature mortality from non-communicable diseases through prevention and treatment and

promotion of mental health and well-being, deaths and injuries from road traffic accidents.

- Achieve Universal Health Coverage (UHC), including financial risk protection, access to quality essential health-care services and access to safe, effective, quality and affordable essential medicines and vaccines for all.

Medium-Term Strategic Framework and NDP Implementation Plan 2019-2024

The plan comprehensively responds to the priorities identified by the cabinet of the 6th administration of democratic South Africa, which are embodied in the Medium-Term Strategic Framework (MTSF) for the period 2019-2024. It is aimed at eliminating avoidable and preventable deaths (*survive*); promoting wellness, preventing and managing illness (*thrive*); and transforming health systems, the patient experience of care, and mitigating social factors determining ill health (*transform*), in line with the United Nation's three broad objectives of the Sustainable Development Goals (SDGs) for health. The table 1 below outlines the MTSF impact, outcomes, and pillars from the Presidential and Provincial Summit.

Table 1: Alignment of MTSF Impact, Outcomes and Pillars from Presidential and Provincial summit

	Impact	Outcomes	Presidential Health Summit Compact Pillars	Provincial Health Summit Pillars
Survive and Thrive	Universal Health Coverage for all South Africans progressively achieved and all citizens protected from the catastrophic financial impact of seeking health care by 2030.	Progressive improvement in the total life expectancy of South Africans Reduce maternal and child mortality	N/A	Pillar 6: Strengthen service delivery through strengthened intergovernmental collaborative government model, (Thuma mina, Operation Masiphathisane and addressing social determinants of health)
Transform		Universal Health Coverage for all South Africans achieved	Pillar 4: Engage the private sector in improving the access, coverage, and quality of health services	Pillar 1. Rationalisation of health service delivery platform to facilitate National Health Insurance realisation and to address access to appropriate health services
			Pillar 6: Improve the efficiency of public sector financial management systems and processes	
			Pillar 5: Improve the quality, safety and quantity of health services provided with a focus on primary health care.	Pillar 9: Quality and safety of health services will be prioritised towards accreditation of health facilities for NHI.
			Pillar 7: Strengthen Governance and Leadership to improve oversight, accountability, and health system performance at all levels	Pillar 7: Governance, leadership, monitoring & evaluation with emphasis on creation of a culture of accountability and participation by all members

	Impact	Outcomes	Presidential Health Summit Compact Pillars	Provincial Health Summit Pillars
			Pillar 8: Engage and empower the community to ensure adequate and appropriate community-based care	Pillar: 2 Strengthen implementation of mental health services through innovative planning, focusing on mainstreaming the mental health services and ensuring that all mental health teams are multidisciplinary at all levels.
			Pillar 1: Augment Human Resources for Health Operational Plan	Pillar: 5 Human resources for health to address the staff shortages and appropriate skills mix
			Pillar 2: Ensure improved access to essential medicines, vaccines, and medical products through better management of supply chain equipment and machinery	Pillar 3: Infrastructure planning, delivery, medical equipment, and maintenance
			Pillar 6: Improve the efficiency of public sector financial management systems and processes	Pillar 8: Small business development, financial management and innovative ways of revenue generation
			Pillar 3: Execute the infrastructure plan to ensure adequate, appropriately distributed, and well-maintained health facilities	Pillar 3: Infrastructure planning, delivery, medical equipment, and maintenance
			Pillar 9: Develop an Information System that will guide the health system policies, strategies, and investments	Pillar 4: Development of ICT platforms, automation, and digitization of the sector through improving capacity, systems integration, disaster recovery and information security planning systems

3. PROVINCIAL PLANS

3.1 Provincial Medium-Term Strategic Framework and Mandate Paper

Eastern Cape Department of Health (ECDoH) continues to put emphasis on the Medium-Term Strategic Framework (MTSF) Priority area of Education, Skills and Health and the Provincial Development Plan (PDP) goal of Human Development through the interventions which seek to improve the health profile of the province. The Department's plan highlights the interventions that will be implemented towards achieving the key integration areas within the provincial plan as follows:

Table 2: Key integration areas and planned interventions

Impact	Apex indicator	Key Integration area	Planned Interventions	Roles played by other stakeholders
Thriving citizens	Human Development Index - Life expectancy - Education attainment - Per capita income	1. Inclusive Early Childhood Development	Implement 1 st 1000 days' interventions.	STC Cluster role: - Improved School Readiness of Learners. - Increased development of young children to their full potential
		2. Gender Based Violence and Femicide	Roll-out implementation of Post Exposure Prophylaxis to all facilities Support all the eleven Thuthuzela Centres and strengthen hospital socio-psychological care for those admitted and after discharge. Offer health dialogues on bullying at schools.	Safety: - Police oversight and crime prevention DSRAC: - Social cohesion and nation building DSD: - Psycho-social support, advocacy and awareness
		3. Non Communicable Diseases and Mental Health	Roll out a health quality improvement plan in public health services. Disease-prevention strategies at a community level. Strengthening the prevention of mental disorders, substance, drug, and alcohol abuse to reduce unnatural deaths.	DSD, DOE: - Strengthen integration in mental health management. - Stakeholder to have well defined MOUs, role clarification and collaborations for

Impact	Apex indicator	Key Integration area	Planned Interventions	Roles played by other stakeholders
				prevention, management, and rehabilitation of mental health care users. DSD Discharge centre post admission DSRAC: • Move for health projects DOE Inclusion of nutrition education in the curriculum
		4. Anti-poverty programmes	Implement and Coordinate Anti-poverty programmes/initiatives (Quintile approach used) Expand access to Primary Health Care services through PHC WBOT.	OTP • Monitor and evaluate the multidimensional collaborative approaches in poverty alleviation, food and nutrition security. DSD • Coordinate food security & nutrition interventions in the province. DRDAR • Collaborative efforts geared towards improving food security and nutrition.
		5. Youth development	Reduction of teenage pregnancy. Department of Health in partnership with TB/HIV Care and	All STC Departments Youth empowerment

Impact	Apex indicator	Key Integration area	Planned Interventions	Roles played by other stakeholders
			roll out the implementation of the Nzululwazi model. Establishment of youth zones to increase access to sexual and reproductive health services among youth. Disease prevention through healthy lifestyles. Prevention of substance abuse.	and delopmental programs
		6. Skills Development and training	Internship programme. Artisan training and development.	STC Role
		7 Broadband and integrated infrastructure coordination and delivery	Maintenance of buildings and equipment. Provision and maintenance of good health infrastructure. Implementation of connectivity to all facilities.	OTP & STC Role Broadband roll out

4. UPDATES TO RELEVANT COURT RULINGS (List)

The Noyila public health defense judgment released on 7 February 2023, found in favour of the ECDOH, sets an important precedent in the Eastern Cape. The judgment opens the door for the ECDOH to raise the public healthcare remedy and undertake to pay remedy in pending and future medical negligence cases against it. The ruling will lead to the improvement of rehabilitation services of the department.

The Noyila matter is being appealed, as such similar matters are reserved pending the outcome of the appeal process.

PART B

STRATEGIC FOCUS

PART B: STRATEGIC FOCUS

1. VISION

Optimal health outcomes for the people of the Eastern Cape Province.

2. MISSION

To attain Universal Health Coverage (UHC) for the people of the Eastern Cape Province, through Primary Health Care (PHC) approach utilising resources efficiently, to enable present and future generations to achieve optimal health outcomes and quality.

3. VALUES

The department's activities will be anchored on the following values in the next five years and beyond:

- Equity of both distribution and quality of services.
- Service excellence.
- Customer and patient satisfaction.
- Fair labour practices.
- High degree of accountability.
- Transparency (maintaining confidentiality).
- Respect.

4. UPDATED SITUATION ANALYSIS

4.1 External environmental analysis

4.1.1 Overview of the Province

The Eastern Cape is spread over an area of 168,966 km² and constitutes 13.8 percent of the South African land area and is located on the east coast of South Africa between the Western Cape and KwaZulu-Natal provinces. Inland, it borders the Northern Cape and Free State provinces, as well as Lesotho. The province is the fourth largest Province in the country after Western Cape, Kwa Zulu Natal and Gauteng. The region is known for its remarkable natural diversity, rugged coastline, and scenic mountains, ranging from the semi-arid Great Karoo to the forests of the Wild Coast and the Keiskamma Valley, the fertile Lang Kloof, and the mountainous southern Drakensberg region.

The province is divided into two metropolitan municipalities (Buffalo City Metropolitan Municipality and Nelson Mandela Bay Metropolitan Municipality) and six district municipalities, which are further subdivided into 31 local municipalities. Five districts (Alfred Nzo, Amathole, Chris Hani, Joe Gqabi and OR Tambo) fall under SEQ 1 which means are mostly deprived with only 1 district and 2 metros outside of this category. (Sarah Baartman, Buffalo City and Nelson Mandela)

4.1.2 Demographic profile of the province

The figures 2 and 4 below show that the Eastern Cape has a population of over 7.2 million people, with the most populous district being O.R. Tambo with 1.5 million people and the least populous district is Joe Gqabi, with a population of 393 048 people. Females constitute 52.6% (3 806 162) while males are at 47.4% (3 424 042).

The distribution according to race is 85% of the total population is black African, 7.6% is coloured, 5.6% is white and Asian comprises less than half a percent. The age distribution is as follows: children under the age of 15 – 33%; Young adults (15-59) at 60.2% while the elderly constitute 6.7% and has seen a significant drop from 11.6% in 2016, this may be attributed to Covid19 impact to the elderly .

Fig.2: EC population distribution by Districts, Sex – in 2022

Source: Stats SA 2022

Youth and elderly form a significant segment of the provincial population, beckoning higher demands for basic services as a result, the capacity of the EC province is usually overstretched due to high demand of basic services like education, health care services, social services, employment opportunities and housing. These challenges are further exacerbated by the historical backlogs that were a result of the previous apartheid and homeland governments especially in the OR Tambo and Alfred Nzo districts with more than a quarter of the provincial population for the province.

Population Pyramid

Fig. 3: Eastern Cape Population by age and sex (Stats SA mid-year population estimates, 2022)

Source: Stats SA 2022

Figure 4: Population by age group in EC districts

Total Fertility Rate and Life Expectancy at birth

The 2022 mid-year population (Stats SA) estimates that the fertility rate of Eastern Cape to be around 2.86, has shown a decline over the decade from 3.14, and with the interventions implemented a further 0.05% drop is projected over the next years. Life expectancy at birth is improving after the interruptions by the SARS-CoV-2 pandemic, for females, it is at 66 while for males it is estimated at 59.8 years.

4.1.3 Social Determinants of Health for the Province

Poverty, unemployment, poor education, housing, poor access to piped water, and sanitation are the social determinants of health that characterize the Eastern Cape Province. The figure 5 below reveals significant discrepancies in basic needs throughout the districts of Eastern Cape. Although the Nelson Mandela Bay Metro has achieved almost complete coverage of piped water, sewage, and electricity, areas such as Alfred Nzo and Joe Gqabi still face challenges, with just 50% having access to piped water and 56% having access to electricity. The uneven distribution of resources emphasizes a need for prioritized efforts to address these disparities and ensure that all individuals have fair and equal access to essential services for their health and well-being.

Fig 5: Disparities in Water , Sanitation and Energy across EC Districts – 2022

Source: Stats SA (2022)

Economic growth and employment

According to the South African Reserve Bank, the country's economic conditions remain poor and the real GDP growth for the near term is projected to average 1.4 percent from 2023 to 2025, which is lower than the initial projections of 1.6 percent as contained in the 2022 Medium Term Budget Policy Statement, mainly due to energy and logistical constraints binding South Africa's growth outlook.

According to Provincial Treasury, Budget Guidelines Economic and Fiscal Outlook, June 2023, the Eastern Cape Province recorded a consecutive decrease in unemployment where the percentage dropped drastically from 47.9% in quarter 4 of 2020 to 42.1% in quarter 4 of 2022, which symbolises an economic recovery. Notwithstanding a drop in the unemployment figures, unemployment remains high, and it is above the national level of 32.7%. The Province has an annual per capita income by population of R53 000 compared to Western Cape of R100 000 followed by Gauteng of R98 000 with Limpopo Province having

the lowest per capita income of R45 800 (IHS Markit Regional explorer. 2022). This may have an impact on the nutritional and health status of the province.

Medical Aid Coverage

The figure 6 below indicates that the proportion of beneficiaries to medical aid in South Africa is 15.2 % with the Western Cape having more beneficiaries at 25.1% and the Eastern Cape having a 10.5% of population on medical aid. The public health system in the province services almost 90 % of the population.

Fig 6 Medical aid coverage per Province

Source: General Household survey 2020

Schooling

The figure 7 below illustrates the education attainment in the province:

About 65 % of the EC population across districts has secondary education with some districts e.g. OR Tambo, Chris Hani with about 10 % of people reporting no schooling and grade 0-2. About 10% of the population reported that they have a post-secondary qualification. Level of education especially for women is directly correlated to the health status of the children.

Fig 7: Highest level of education in the Province

4.1.4 Epidemiology and Quadruple Burden of Disease (BOD)

The Province is experiencing high burden of disease and the service platform is overburdened due to social determinants of health that the Department has no control over. The intervention that the Department had put in place is Inter-Governmental Relations (IGR) collaboration and integrated planning across sectors.

Epidemiologically, the country continues to be confronted with a quadruple Burden of Disease (BOD) of HIV and TB, high maternal and child morbidity and mortality, rising non-communicable diseases, mental health and high levels of violence and trauma.

The leading causes of mortality

In figure 9 below, leading causes of death in the early ages are attributed to natural causes, and death due to natural causes declined with an increase in age among the less than 12 months to less than 25 years. The ages of 15-19 and 20-24 years are mostly affected by non-natural causes at 43.1% and 47.9% respectively. This informs the health sector life course approach and resource allocation for targeted interventions as per the age categories.

Fig 9: Natural versus non-natural causes of mortality

Source : Stats SA 2020

As depicted in the figure 10 below, Tuberculosis (TB) remains a leading cause of natural deaths and is followed by Diabetes Mellitus. In the overall TB and HIV followed by non-communicable diseases remain the top leading causes of death in the Eastern Cape. The order of the top ten causes of death is changing and reflects the massive effort and expenditure on the HIV epidemic in the last two decades, which have reduced the contribution of deaths due to HIV in the province. The success of antiretroviral treatment programme, with focus on early initiation of treatment in the course of the disease has resulted in an improvement in life expectancy in the province.

Eastern Cape is experiencing an increasing burden of non-communicable diseases and mental health disorders as well as preventable risk factors such as the changing lifestyles (reduced physical activity and increasing consumption of foods high in salt and sugar and other factors) as well as ageing of the population.

Fig 10 : Broad causes of natural death in Eastern Cape

Source : Stats SA 2020

The figure 11 below shows that accidental injuries , assaults and transport accidents are leading causes of non- natural deaths in the EC. This may impact negatively the accident and emergency units within the province.

Fig 11: Non-Natural causes of deaths

Source: Stats SA , 2021

Disability

Disability rates are generally rising as people become older, with the youngest age groups having the lowest rates. The prevalence of disabilities appears to increase dramatically between the ages of 60 and 64. The working age groups of 25-54 have very stable disability rates ranging from 20,000 to 40,000. Overall, the results show that older people in the province have significantly more disabilities than younger people, which is most likely attributable to age-related decline. This emphasizes the necessity for specific assistance programs for older and disabled persons.

Fig 12: Number of disabled in the EC by age in 2020

4.2 Internal Environmental Analysis

4.2.1 Service Delivery Platform/ Public Health services

The EC service delivery platform has 1091 facilities as listed below in Table 3 :

Table 3: Facility type per district

Org Unit Type	Alfred Nzo DM	Amathole DM	Buffalo City MM	Chris Hani DM	Joe Gqabi DM	N Mandela Bay MM	O Tambo DM	S Baartman DM	Grand Total

Grand Total	98	196	100	221	88	69	186	128	1086

Source of data: DHIS, 2023

Seven hundred and seventy-seven (777) fixed PHC facilities exist across the province, which are made up of 734 Clinics and 43 Community Health Centres (CHCs). PHC facilities are the entry points to the health systems and provide PHC package relevant for each level; and are referral points for the community-based services. The EC has 85 hospitals, the highest number in the country, despite being the fourth-largest province by population and second-largest by land mass. The province is implementing service delivery optimisation to improve efficiencies in the service delivery platform to address the 19 hospitals, which have less than 50 beds and do not fit the formal definition of a district hospital in terms of "Policy on Management of Public Hospitals (2012). Three TB hospitals are also under the process of service delivery optimisation.

The Primary Health Care utilisation rate has picked up to above 2 visits provincially, with at least five districts out of eight with a range of 2.1 to 2.6. The steady utilisation rate coincides with the increase in community-based activities in the form of Thuma Mina campaigns that includes health promotion and prevention programs.

The cost per PHC visit remains high at R547.33 in 2021/22 and R508.50 in 2022/23. The Expenditure per capita for the uninsured population is also highly associated with the socio-economic state of the populations served. On average expenditure per capita in 2021/22 was at R1 242,85 and R1 190,52 in 2022/23.

PHC facilities Quality Improvement Initiative

Ideal Clinic Realization and Maintenance Program

All districts conducted the Status Determinations as per the Ideal Clinic Realisation and Maintenance Monitoring Framework to continuously improve towards Ideal status. The final Status Determination was done during the fourth quarter through Peer Review updates, which marked the outcomes for 2022/23 Financial year (FY).

Out of seventy (70) clinics assessed forty-two (42) clinics achieved ideal status. The average performance score obtained was 76% with the district's score ranging from 63% to 89% which showed a progressive improvement in facilities towards Ideal status.

Table 4: Ideal clinic Status Determination Peer Review updates outcomes per district

District	# Facilities	# Facilities that conducted SD	Average % scored	# Facilities with new IC status	% of Facilities with IC status
Eastern Cape Province	734	70	76%	42	6%
Alfred Nzo	72	8	63%	2	3%
Amathole	143	30	77%	17	12%
Buffalo City Metropolitan	74	9	89%	8	11%
Chris Hani	152	14	71%	7	5%

Oliver Tambo	142	4	71%	3	3%
Sarah Baartman	60	3	75%	3	5%
Average / Total	734	70	76%	42	6%

Source: Ideal health facility report

Patient Experience of Care (PEC)

In improving the quality of health services and ensuring that Patient Experience of Care in fixed public health facilities improves facilities are required to conduct surveys on the Patient Experience of Care where several satisfied responses are calculated against the total number of responses. During 2022/23, the clinics managed to achieve 85% which translates to a total number of 304 824 satisfied responses, while with CHCs a patient satisfaction rate of 75.7% which translates to 20 972 satisfied responses, was achieved for the province.

Contracting Unit for Primary Health Care:

NHI Bill, Clause 37, makes provision for the establishment of the Contracting Unit for Primary Health Care (CUP). The Contracting Unit is the organisational unit with which the fund contracts for the provision of primary health care services within a specified geographical sub-district area. During the financial year 2023/24, CUP for Primary Health Care is implemented at Ingquza Hill. The CUP is the organisational unit with which the fund contracts for the provision of PHC services within a specified geographical sub-district catchment area. The newly built Flagstaff CHC was identified as the health facility to implement CUP.

Hospital Care

According to the District Health Barometer (DHB 2022/23), the province has an average of 22 beds for 10 000 population compared to the national average of 20.3 beds per 10 000 population. With Alfred Nzo having the lowest ratio of 13 beds per 10 000 population while Buffalo City has 33 beds per 10 000 population.

This analysis is irrespective of type of bed. EC is prioritising the implementation of the full Regional Hospital packages to ensure access and equity to specialist services. The hub and spoke model is adopted to improve effectiveness and efficiencies within the provincial referral system.

The district hospital Patient Day Equivalent (PDE) declined by 21% from 2021/22 to 2022/23 and this contributed to the increase in expenditure per PDE to R3 819 where the province moved from being the lowest-spending province to fifth place in spending. This may partly explain the increase in PHC headcount which also resulted in a decline in PHC expenditure per headcount from R655 in 2021/22 to R600 in 2022/23. It is evident that the province relies more on the PHC service platform with its utilisation rate per uninsured person at 2.3 visits, which is above the national average of 2.0 visits. However, a concern is that the PHC expenditure per capita and per headcount remains below the national average (DHB 2022).

Hospital efficiencies

Tables 5 & 6 below outlines the hospital efficiencies for different levels of hospital care, the district hospitals continue to be inefficient with low Bed Utilisation Rate (BUR) below 50%. Average Length of Stay (ALOS) in the hospitals have remained consistent through the years especially in the Central Hospitals. This high ALOS is attributed to the longer stay of spinal orthopaedics and neurosurgical clients. Establishment of a rehabilitation centre in the eastern part of the Province may alleviate the challenge. The central hospital has the highest caesarean section rate at 94%. The EC is undertaking a project to strengthen the surrounding district hospitals to offer safe caesarean sections to alleviate the situation.

The Outpatient Department (OPD) new client not referred rate is decreasing across different levels of hospital care except the tertiary hospitals. A high OPD new client not referred rate value could indicate overburdened PHC facilities or a sub-optimal referral system. In light of the National Health Insurance Policy, a PHC level is the first point of contact with the health system and it is key in ensuring health system sustainability. If PHC works well and the referral system is seamless, it will result in fewer visits to specialists in referral hospitals and emergency rooms. High ALOS high in Regional, Tertiary, and Central hospitals, coupled with low bed utilisation rates are a concern. There is an urgent need to rationalise the number of beds in district hospitals.

Hospital efficiencies

Table 5 : Hospital efficiencies

Eastern Cape Province	OPD new client not referred rate			Average length of stay - total			Inpatient bed utilisation rate

HIV and AIDS & STI

The Department is consolidating its efforts towards the implementation of the 95-95-95 UNAIDS targets where 95% of all people living with HIV will know their status, 95% of people diagnosed with HIV will receive sustained ART and 95% of people receiving ART will have viral load suppression, HIV pandemic remains among the leading causes of morbidity and mortality in the province.

Provincial Cascade - Public and Private Sector

The Eastern Cape is at 92-74-90 in terms of performance against the 95-95-95 targets across its total population using data available in the Public & Private sectors. Data available from the private sector suggest that a total of 35 034 clients receive ART through private medical aid schemes in Eastern Cape. For Adult Females and Adult Males, this number is 23 810 and 10 805 respectively.

Results for each of the sub-populations vary with adult females being at 93-78-91, adult males at 91-67-91, and children (<15) at 82-78-68. There are gaps across the cascade for adults & children. Case finding, ART initiation and retention have all underperformed and should be addressed through focused interventions in this sub-population.

To achieve 95-95-95 targets, Eastern Cape must increase the number of clients on ART with 196 058. For adult females the required increase is 108 559, whereas an increase of 80 241 ART adult males are required. Operation Phuthuma is implemented to address the challenges.

Figure 13: 95-95-95 Provincial Cascade - Public and Private Sector

Source : NDOH, 2023

Tuberculosis (TB)

TB remains one of the leading causes of death amongst people living with HIV in South Africa. However, more interventions are implemented to prevent unnecessary deaths and to improve TB outcomes. Eastern Cape is challenged with increasing TB disease, and the department is on the verge of finding the missing undiagnosed people with the aim of putting them on treatment. The figure 14 below depicts that the total number started on treatment was 1 574 with a success rate 59% of 1 574. The following challenges are noted; high lost to follow up and high death rate. The Province plans to conduct mortality and clinical audits in districts and Multi-Drug Resistant TB (MDR TB) decentralized sites; continuous monitoring done and conduct district support visits.

Fig 14: TB Treatment outcomes for 2020

Source: DHIS, 2020

Maternal and Women's Health

Prevention of unwanted pregnancies remain one of the key strategies in improving maternal and womens health. According to EC Health, (2021), couple year protection rate is not improving, in 2020 (41.5%) to 41.6 % in 2021. This challenge of low couple year protection may lead to unwanted pregnancies; this is concerning when considering that teenage pregnancy is increasing over the period. The delivery in 10-19 years in facility rate which is defined as deliveries where the mothers of 10-19 years old conducted by a trained health care worker in a health facility.

Fig 15 : Delivery in facility 10-19 years

Source DHIS 2021

The department is also increasing access to sexual reproductive health and rights of young girls and boys, by establishing youth zones throughout the province, which provides a package of services available in clinics with a specific focus on Sexual reproductive health and HIV related services.

Ante Natal Care

Fig 16 below depicts four out of eight districts in the Province are above the National HIV prevalence among pregnant women (27,5%) i.e. Amathole, Chris Hani, Alfred Nzo and Nelson Mandela Bay.

Fig 16: HIV Prevalence among pregnant women in EC

Martenal mortality

An increase of martenal mortality in facility rate was noted in 21/22 (114,6/100 000 live births) to 22/23 (124,5/ 100 000 live births).

Fig 17: Provincial Maternal mortality trends in facility ratio/100 000 FY 2019 - 2022/23

Source: DHIS 2022

Child Health

Neoantal Deaths

Neonatal deaths in facility rate which contributes to infant mortality, showed an increase from 12.5 per 1000 live births in 2018/19 to 13.8 per 1000 live births in 2022/23 (figure 25).

Fig 18: Neonatal deaths in facility rate (per 1000 live births), 2018/19 – 2022/23

Source: DHIS 2022

Under-5 mortality

The case fatality rate due to diarrhoea, pneumonia, and severe acute malnutrition among children under 5 years has generally been showing decline in the province, which might be associated with the child health intervention programmes. The diarrhoeal and pneumonia case fatality rate had been fluctuating between three and four percent over the five-year period under review

The ECDoH acknowledges the report from the “*Human Rights Commission*” about child malnutrition in the province. The report emphasizes a reduction in the number of fatalities caused by severe acute malnutrition, which may be attributed to the collaborative efforts of government departments and stakeholders. Nevertheless, some districts, like Amathole and Buffalo City, see consistently elevated rates of Severe Acute Malnutrition (SAM) and sudden increases in cases of diarrhea. This implies that current initiatives may not be effective and equitably reaching all groups, maybe due to the influence of socioeconomic factors.

Fig 19: Case Fatality rates for Children under 5 (2019-2023)

Non communicable disease

The global trend of escalating non-communicable diseases is evident in South Africa and the Province. Diseases of lifestyle such as obesity, hypertension, and diabetes result, inevitably, in costly hospital admissions for complications such as stroke, renal failure, heart disease and blindness. COVID-19 pandemic has escalated the importance of dealing with non-communicable diseases and co-morbidities.

According to South African Demographic Health Survey (SADHS) 2016, 13% of women and 8% of men 15 years and older are diabetic in South Africa, while hypertension prevalence was shown to be 46 % and 44% for women and men respectively.

The province plans to establish a surveillance system for non-communicable diseases. Strengthen the digitalisation of information management in NCDs management e.g. Vula app; SYNCH etc. The Department in partnership with Department of Sport Recreation Arts and Culture have started a partnership in implementing a “Move for Health” project.

Mental

Overall, the mental health case load appears to be relatively stable across all districts over the years. Nelson Mandela district consistently has the highest case load, while Sarah Baartman district has the lowest. There was a slight increase in case load for Alfred Nzo and Joe Gqabi districts in 2023

Fig 20: Trends in Mental health case load by District in the EC.

The province's service delivery model is focusing on strengthening community based services, district health services, provision of mental health services in general hospitals, specialised mental health services that provides for acute, sub acute, chronic rehabilitations services, substance abuse as well as forensic services. In addition the province has strengthened the mental health child and adolescent services in Fort England Hospital with additional 14 beds unit to manage acute and subacute mentally challenged children in the province.

Mental illness associated with substance abuse is a public health concern and partnerships will be explored to render the relevant services to prevent and treat substance abuse effectively. The burden of disease has shown a radical increase in substance abuse in the province and the country, thus increasing a need for social service and rehabilitation services. There is a critical need of facilities offering rehabilitation services to augment the – 440 beds in public and 962 private sector.

Cancer

Esophageal cancer is the leading cause of death in Eastern Cape Province, accounting for a significant 26.0% of all cancer-related fatalities. Esophageal cancer is not the only challenge in the fight against digestive system malignancies. Other poorly defined digestive organs, liver and bile ducts, and even tongue cancers are also among the top ten deadliest forms of cancer. Furthermore, there is a worrisome 14% of cancers whose origin is unclear, highlighting the need for further studies. Although there are less common types of cancer such as Kaposi sarcoma, uterine, and placental cancers, the prevalence of esophageal and digestive system malignancies needs urgent attention.

This data presents a clear and striking image, however, knowledge serves as the first weapon in this battle. Early identification, preventive measures such as social and behavior change interventions and immunizations, improved access to health care, and allocation of resources towards research are essential measures for overcoming cancer in Eastern Cape Province.

Fig 21: Distribution of Cancer Deaths by Type in EC

Source: SAMRC 2022

Pharmaceutical Services

Medicine availability has improved to achieve 84.3% of essential medicine availability.

Centralised Chronic Medication Dispensing and Distribution (CCMDD) programme forms part of the department's flagship programmes and it continues to be the departmental strategy to reduce patient numbers at health facilities. The programme achieved a steady increase of clients throughout the year while retaining the old clients on the programme. There were 419 270 (December 2023) active patients who collected their medicines packs through the CCMDD programme.

The department has systems for monitoring medicine availability. The system uses a mobile phone-based Stock Visibility Solution (SVS) and a desktop application RxSolution. These systems strengthen inventory management within health facilities. These can report stock levels for ARVs, TB medication and vaccines.

4.3 Organisational Environment

The Department is on the process of reviewing the service delivery model (SDM) to ensure that the Department has an organizational structure that is fit for purpose and also displays functional alignment between Micro-Macro Structure. An Organogram Steering Committee was established to conduct physical site verification visits at districts and institutions on identified unique parameters.

As the Department is finalising organogram realignment, this process has incorporated rationalisation and service optimisation interventions. The interventions incorporate lessons learnt from response to the COVID-19 pandemic especially in relation to the use of the hub & spoke method to ensuring adequate resourcing of targeted facilities (hubs) in order to support surrounding facilities (spokes). Physical headcount exercise which is a critical change management process central to the implementation of the organogram, has been piloted successfully.

The status of Human Resources in the department

The vacancy rate for the department is reduced from 13% (2022) to 7.7% (2023) below the provincial norm of 10%. The department set out key priority areas to focus on to ensure improvement in the services rendered to the people of the province.

Through the advertised posts the department is further striving to address employment equity under-representation, youth employment and to achieve the 50/50 % target for women and men at Senior Management Service (SMS) level. The department has a total of 76 SMS members of which 47.6% are women and 52.4% are men.

The department has been experiencing a challenge of attracting critical skills. This is further compounded by the shrinking Compensation of Employees (COE) budget over this period which has resulted in the non – implementation and or non-funding of Annual Recruitment Plans. The fiscal consolidation measures will make it very difficult to recruit new employees in the 2024/25 financial year.

Resignations and death have also played a role in the decrease of the staffing compliment. The top 6 critical skills the department needs currently are: Speciality Nurses – areas such as Maternity & Labour wards, Medical Specialists – (All disciplines especially Psychiatrists); Psychologists; Artisans – to assist in the maintenance of our health facilities and equipment; Paramedics and general workers.

Human resources will, over the next years, focus on improving productivity through the development and implementation of the 2030 Human Resource for Health Strategy; becoming agile and responsive to client needs; automating the recruitment process to address turnaround times; and improving training and development model of health professionals and ensure proper skills mix within the organisation. In the coming Medium-Term Expenditure Framework (MTEF), the department will undertake a skills audit, person to post matching as well as organisational culture and climate study.

Employee Wellness Programme

The year 2022/ 23 was the recovery period post COVID-19 pandemic which had a lingering negative impact on the health workforce with COVID-19. The infections and reinfections continued despite vaccination, boosters and a rising number of incapacity cases showing post Covid-19, fatigue, physical and mental illness. Analysis of Employee Wellness programme utilisation revealed that there is a sharp increase of work-related conflict, physical and mental illness, and substance abuse, all of which raises red flags that the department is a workforce needing serious psychosocial support.

Ex-mineworkers Intervention Program

The Eastern Cape Province through the National Department of Health Medical Bearuea for Occupational Disease/ Compensation/ Commissioner for Occupational diseases MBOD/CCOD support, in 2016 initiated a track and tracing project that resulted in a ground-breaking model of community based Occupational Health Services (implemented through Services-on-Wheels Outreach Model). As case study culminating from rollout of the above-mentioned pilot, the National Department of Health rolled out this model to South African Development Community (SADC), based on these best practices.

Following this initiative, Nelson Mandela University submitted a proposal on behalf of Premier's Provincial Steering Committee and Eastern Cape Department of Health, to the National Department of Health (National Health Insurance) to the value of R 413 million to ensure that this ex-mineworker intervention objectives are realized and the related challenges are addressed in totality.

According to the TEBA records (Fig 29), it is estimated that there are 922 888 Ex-mineworkers in South Africa with Eastern Cape having 281 553 (31%) followed by North West Province with 168 171 (18%) and Gauteng with 160 530 (17%).

The Eastern Cape accounts for a total of 31% Ex-mineworkers across the country. This demonstrate that the province was and still a high labour sending area when it comes to working in the mines.

Fig 22: Ex mineworkers per province

Province	Total	%
Eastern Cape	281553	31
North West	168171	18
Gauteng	160530	17
Free State	112077	12
KwaZulu-Natal	92092	10
Limpopo	75527	8
Mpumalanga	27264	3
Northern Cape	4987	1
Western Cape	687	
Total	922888	

Compensable Disease	Total	Not Paid	Amount
Silicosis	33 045	8 993	588m
Tuberculosis	108 883	61 310	308m
Asbestos Related Diseases	13 688	5 289	196m
Obstructive Airways Disease	5 084	1 701	126m
Pneumoconiosis	10 914	1 807	126m

Source: TEBA data, The ex-Mineworkers per provinces (1984 -2013)

The intervention seeks to deal with lung diseases such as Tuberculosis, Silicosis, and Lung Cancer etc. Tuberculosis remains to be a challenge amongst the Ex-mineworkers as vulnerable group hence it will be attended in the mines within the program of action.

The Eastern Cape Health working with Office of the Premier, Ex-mineworkers Council decided to have a Project Management Office within the department.

The Project Management unit will be working closely with Nelson Mandela University and Walter Sisulu University on a built operate and transfer (BOT) for a period of three years. The intervention will look at setting up Occupational Health Centres at Sir Henry Elliot Hospital and Bisho Hospital. The program will focus on services on wheels with all four streams.

- Occupational Health Care Services & Data Management Systems
- Community-Based Health Programmes & HAST Services
- Research, Innovation & Investigative Health Services
- Resource Mobilisation and Capacity Building

HEALTH TURNAROUND STRATEGY

The Department continues to implement its Health Turnaround Strategy to guide the implementation of the healthy communities, families and individuals interventions. This will be achieved through digitally enabled, data driven, quality health and care service that, through strategic partnerships and collaboration, promotes health, prevents disease, and provides quality curative, rehabilitative and palliative care. These turn around plan initiatives include financial sustainability; integrated medico-legal interventions; service delivery optimization; leveraging of digitalization and e-Health; and interventions to guarantee healthier communities.

The turnaround is supported by a performance-driven organizational culture that has three layers –

- the first being effective leadership, capable teams and valued employees;
- the second, institutionalized performance reporting and management systems; and
- the third, progressive change management, stakeholder engagement and communication.

The department is implementing its turnaround strategy focussing on five pillars. The following interventions were implemented:

Pillar 1: Towards Financial Sustainability:

The Department has stemmed the haemorrhage of funds from the budget through the upfront, lump sum medico-legal settlements by launching two critical legal defence strategies - the Stay of Writs and public health defence medico-legal strategies. The Department thus spent less than R500m total expenditure across the last two financial years since the implementation of the health turnaround. This is significantly less than the projected two billion rand (R2bil) outflow to settle cases on the court rolls for these years, had the coordinated legal defences not been mounted.

Pillar 2: Integrated Medical Legal Strategy

The department held a medico-legal seminar September/October 2023. The said seminar revelled the need for the review of the whole Provincial medico-legal strategy, in particular Pillar I (stop the haemorrhage of funds).

There has been a reduction in the number of medico-legal claims year on year, with the biggest drop observed in the last two years, illustrated in the table and Fig 23 below:

Fig 23: Medico legal Claims

YEAR	Number of claims	Variance Yr on Yr	
		No	%
Yr 2012/13	104		
Yr 2013/14	207	103	99%
Yr 2014/15	334	127	61%
Yr 2015/16	458	124	37%
Yr 2016/17	389	-69	-15%
Yr 2017/18	566	177	46%
Yr 2018/19	525	-41	-7%
Yr 2019/20	418	-107	-20%
Yr 2020/21	350	-68	-16%
Yr 2021/22	364	14	4%
Yr 2022/23	233	-131	-36%

As can be seen in the table above:

- There were 233 new claims registered in 2022/23 vs 364 in the 2021/22 year.
- This is a 36% reduction in new claims registered in 2022/23 compared with the previous year
- And a 58% reduction compared to the peak number of 566 claims in 2017/18

The Noyila public health defence judgment released on the 7 February 2023, found in favour of the ECDOH, sets an important precedent in the Eastern Cape. The judgment opens the door for the ECDOH to raise the public healthcare remedy and undertaking to pay remedy in pending and future medical negligence cases against it. In future cases, the ECDOH will not have to prove that the law should be developed in each and every case. Instead, it will be able to raise the remedies as alternatives to a once-and-for all lump sum damages award. The Plaintiff has been granted leave to appeal to the Supreme Court of Appeal (SCA) whilst the Department has been granted permission to proceed with implementing the order, whilst the appeal runs its course in the year.

Rehabilitation Centres of Excellence

From within the 43 facilities currently providing CP services, the department has prioritised facilities in all eight districts and are expected to operate using the hub and spoke model to promote the efficient use of resources.

The Department has invested in training therapists on Cerebral Palsy (CP) Management, basic and intermediate level of wheelchair seating. This training is one of the key expertise required to be able to prescribe and issue a wheelchair to the cerebral palsy patient.

Turnaround times on Promotion of Access to Information Act (PAIA) have improved with information gathered from facilities and scanned to the system. The Records Management Strategy will see the department focusing on securing registries, whilst improving the existing registry infrastructure across highly litigated facilities as priority as the next focus area. Through the hub and spoke approach, clinical teams led by our specialists are playing a very critical part in formulating our defense.

Pillar 3: Service Delivery Optimisation

The Departmental Task Team (DTT) - organized labour with management, supported by the OTP and DPSA experts- kicked off the service delivery review and realignment to the NHI and District Development Model. This will lead to an updated, single organogram that incorporates a rationalized, repurposed service delivery platform..

The Human Resources for Health summit held in August 2022 recognizes the financial situation of the Department and the need for organizational stability and a strengthening of labour relations. A programme of action to give effect to this commitment will be drafted for the year ahead. The appointed task team is to meet to identify those matters that may be considered for tabling at the Bargaining Chamber.

Pillar 4: Digitalisation and e –health

Roll out of HMS2

The eHealth intervention comprises several deliverables that are divided into two implementation phases. The system being deployed is the in-house developed system HMS2, with zero licensing costs for the Department, which is now being extended to the Free State Province.

The Department has made significant progress in implementing the eHealth intervention, having implemented Phase 1 in 20 hospitals and the full Phase 2 modules were implemented as part of an initial pilot at Frere Hospital. The original target completion date for phase 1 modules at the 28 priority

facilities was 31 March 2024 but based on the status of implementation, completion is estimated around October to November 2024.

One of the key deliverables of the eHealth intervention is the electronic PAIA and medico-legal modules, which provide a centralized solution for storing and reporting on all PAIA and medico-legal claims. All such claims are now electronically stored in respective registers and reported on as part of routine reporting and data analytics. Additionally, the Department has begun establishing an electronic data warehouse where routine data National Health Laboratory Services (NHLS), South African National Blood Services (SANBS), and Persal are provided to facilities for improved decision-making and interventions where required.

Call & Dispatching System, Digitising EMS Services

The Department has completed the customisation of the Call and Dispatching System in EMS and invested in the necessary infrastructure in 2022/23. The department had increased the number of call taking staff in the EMS communication centres around the province. A total of 54 call centre staff were recruited in the 2022/23 financial year. This staff will assist in the effective utilization of the call taking and dispatch system.

Connectivity & Broadband Access

From the original 28 priority hospitals, 50% have been equipped with broadband, while the remaining 50% are utilizing the National RT (Transversal Term contract) contract to access Long Term Evolution (LTE) connectivity. The department has established a provincial eHealth Steering Committee, which is driving the project implementation with good interdepartmental support from Provincial Treasury and OTP. The committee comprises various business units representing the Department in all areas of core business, including clinical, finance, supply chain management, facilities management, risk management etc.

Pillar 5: Building Healthy Communities

A significant reduction in maternal mortality rates in the third quarter to 85,8 per 100,000 live births and 112 deaths per 100,000 live births in the fourth quarter compared to around 157 deaths per 100,000 live births during Covid-19 and the lowest rate of around 108 per 100,000 pre-Covid-19.

Reduction child under 5 years deaths and a reduction in deaths due to diarrhoea, severe acute malnutrition (SAM) and pneumonia in children under 5 years with Immunization Under 1-year coverage remaining above 82%, in the main due to the catch-up campaigns launched.

Achieved HIV/AIDS 92: 73: 90 and TUBERCULOSIS: 96: 93: 75 -Operation Phuthuma is a quality improvement approach that encourages prioritization in monitoring the poor performing indicators of all the health programmes including HAST.

Fig 24: Organisational Structure

4.4 Resource Considerations

HIV/AIDS, STI & TB Control ((HAST) is funded through District Health Programmes Grant, Comprehensive HIV/AIDS Component that covers both HIV/AIDS and TB. An approved business plan for 2024/25 covers all the planned activities to achieve the targets set in the 2024/25 Annual Performance Plan (APP).

The resources will be utilized to fulfil the following:

- Procurement of ARVs and TB (including DR-TB) medication, Condoms (Male and Female)
- Ensure seamless laboratory services by the NHLS for all HIV and TB tests
- Compensation of employees for programme management and support.
- Procurement of tools of trade (computers, test kits, medical equipment, etc.)
- Procurement of venues, facilities and accommodation for programme review meetings, trainings, support visits and roll-out of Operation Phuthuma nerve centers
- Procurement of registers and job aids printing in line with guidelines update
- Scaling up Advocacy Communication and Social Mobilization (ACSM) activities to educate and inform communities on Welcome Back campaign for patients that are lost to follow up.
- Undetectable = Untransmutable (U=U) campaign to encourage adherence to treatment, safe circumcision and special events on significant calendar days relating to HIV, STI and TB

To reduce maternal, neonatal, infant and child mortality rate the resources will be required to perform the following:

- Continuous capacitation of clinicians (nurses and doctors) on Essential Steps in the Management of Obstetric Emergencies (ESMOE), K2, Management of Small and Sick Neonates) for better management of pregnant women, intra/ post-partum management and neonates.
- Capacitation of clinicians on Integrated Management of Childhood Illnesses (IMCI) and Integrated Management of Children with Acute Malnutrition (IMAM) guidelines.
- Training of clinicians on family planning methods to increase couple year protection rate. These include insertion of long term contraceptives, intra-uterine devices and implants.
- Procurement of tool of trades (computers, printers, medical equipment etc.).
- Procurement of venues, facilities and accommodation for trainings and support visits.
- Printing of maternity case records, road to health booklets and required registers and stationery

4.4.1 MTEF budgets

Table 7: Summary of payment estimates by programme: Health

R thousand	Outcome			Main appropriation	Adjusted appropriation 2023/24	Revised estimate	Medium-term estimates			% change from 2023/24

Tables 7 and 8 above shows the summary of payments and budget estimates per programme and economic classification from 2020/21 to 2026/27. The total payments increased from R27.994 billion in 2020/21 to a revised estimate of R29.270 billion in 2023/24. In 2024/25, the budget is growing by 2.9 per cent from R29.270 billion in 2023/24 to R30.106 billion as a result of additional funding allocated to the department.

Compensation of employees shows a decrease of 0.1 per cent from R20.028 billion 2023/24 revised estimate to R20.011 billion in 2024/25 budget allocations due to fiscal consolidation measures implemented in 2024/25 as well as post community services contracts that will be terminated by end of the 2023/24 financial year.

Good and services show a positive growth of 11.2 per cent from R7.332 billion in 2023/24 to R8.156 billion in 2024/25 when compared to the revised estimate due to additional funding allocated for medicine to cater for dollar/exchange rate and cost pressures on medical supplies and diesel for non-exempted facilities during load shedding. A further growth is expected in 2025/26 and 2026/27 due to medicine to cater for dollar/exchange rate and cost pressures on medical supplies, fleet and diesel for non-exempted facilities during load shedding.

Transfers and subsidies show a negative growth of 31.4 per cent from R513.614 million to R352.565 million when compared to the 2023/24 revised estimate due to high revised estimate as a result of payment of medico legal claims. In 2025/26 and 2026/27, the department received additional allocation for the payment of medico legal claims.

Payments for capital assets show a positive growth of 14.6 per cent from R1.384 billion to R1.585 billion when compared to the 2023/24 revised estimate due to additional allocation on the NTSG and Health Facility Revitalisation Grant

PART C

MEASURING OUR PERFORMANCE

Province of the
EASTERN CAPE
HEALTH

PROGRAMME 1

HEALTH ADMINISTRATION AND MANAGEMENT

Province of the
EASTERN CAPE
HEALTH

PART C – MEASURING OUR PERFORMANCE

PROGRAMME I: HEALTH ADMINISTRATION AND MANAGEMENT

The Health Administration and Management programme comprises of two main components: The Administration component, which refers to the Executive Authority and lies with the Office of the Member of Executive Council (MEC); and the second component, which is the Management of the organisation and is primarily the function of the Office of the Head of Department.

I.1 Sub-Programme: Health Administration - Office of the MEC

Sub - programme purpose

To provide political and strategic direction to the Department by focusing on transformation and change management.

IMPACT STATEMENTS

Impact	Long, healthy and quality life for the people of the Eastern Cape

The standardised indicators are marked as per colour in the legend where's Provincial Indictors are not marked

Legend	Standardised indicators colour

Table 9: Outcomes, Outputs and Output indicators and targets for the next MTEF for the Office of the MEC

Outcome (as per SP 2020/21- 2024/25)	Outputs	Output Indicator	Audited/Actual performance			Estimated Performance	MTEF Targets						
			2020/21	2021/22	2022/23	2023/24	2024/25	2024/25 Quarterly Targets				2025/26	2026/27

9. Leadership and governance in the health sector enhanced to improve quality of care	Statutory document submitted	9.1.2 Number of statutory documents tabled at Legislature	8 statutory documents	8 statutory documents	7 statutory documents	4 statutory documents	10 statutory documents	1	2	1	6	8 statutory documents	8 statutory documents

I.2 Sub-Programme: Health Management

Sub-Programme Purpose

To manage human, financial, information and infrastructure resources. This is where all the policy, strategic planning and development, coordination, monitoring and evaluation, including regulatory functions of head office, are located.

The management component under the Head of Departments' supervision is comprised of four branches with their sub-components (clusters) as listed below:

Finance Branch

- Financial Management Services
- Integrated Budget Planning and Expenditure Review
- Supply Chain Management (SCM)

Human Resource & Corporate Services Branch

- Information, Communication and Technology (ICT)
- Integrated Human Resource Management (IHRM)
- Human Resource Development (HRD)
- Corporate Services
- Infrastructure
- Internal Audit
- Strategy & Organisational Performance

Hospital and Clinical Support Management Branch

- Hospital Services
- Clinical Support Services
- Emergency Medical Services and Forensic Services
- Quality Care Assurance Services

District Health Services Management Branch

- District Health Support
- District Management Coordination
- Communicable Diseases
- Health Programmes

Table 10: Outcomes, Outputs and Output indicators and targets for the next MTEF for Health Management

Outcome (as per SP 2020/21- 2024/25)	Outputs	Output Indicator	Audited/Actual performance			Estimated Performanc e	MTEF Targets

Explanation of planned performance over the medium-term period

Audit improvement: The audit outcomes have improved. The department will continue to implement an audit improvement plan (AIP) which outlines the strategies to be undertaken in order to achieve the desired audit outcome of unqualified audit opinion. The qualifications emanate mainly from the unauthorised expenditure due to the challenges of medico legal contingency liability.

Human Resource Management: Annually, the department develops the Annual Recruitment Plan (ARP) based on the prioritised critical, new and replacement posts during the financial year. The current vacancy rate is 7.7 % (norm is 10%), with 6 108 posts that are vacant and unfunded. The department has implemented interventions to curb Compensation of Employees (CoE) expenditure. Rationalisation & Service Optimization Project as a Strategic Intent of the Department to ensure maximisation of efficiencies negatively affected filling of vacant posts within the stipulated periods. Furthermore, the Department had to be mindful of the risk of advertising and filling the posts meanwhile the post may be filled through the process of person to post matching within the available resources and the organogram review process.

Medico legal

The Department of Health (DOH), Office of the Premier (OTP), and Provincial Treasury (PT) are working on a joint medico legal strategy that outlines the responsibilities of the 3 parties in the fight against medico legal claims. As part of a tripartite team of provincial government departments mandated by Executive Council (EXCO), their role is to oversee the management of medico legal cases in the Eastern Cape with responsibilities broadly allocated as follows:

DOH – clinical and administrative interventions where the department is pursuing the public health care defence strategy. The aim is to convince the courts that DoH, through its medical institutions, is able to provide adequate level of care to its patients (in particular, the Cerebral Palsy (CP) patients).

OTP – take-over of the medico legal defence, working with the Office of State Attorney and other agencies; and

Provincial Treasury (PT) – investigation of suspected fraudulent medico legal claims as well as funding for medico legal settlements, launched application to provide for staggered payments instead of lump sum payments.

In pursuit of the implementation of the strategies, there are various structures where reports are being made to check if the three departments are still on track and also adhere to the deliverables as expected.

Through the hub approach, our clinical teams led by our specialists are playing a very critical role in formulating the department's defence. The department is working tirelessly to ensure that all CP units and Centres of Excellence in Dora Ngizwa, Cecilia Makiwane and Frere Hospitals are ready to serve and have all the necessary capabilities. The project will be rolled out to other facilities.

Digitisation: The Department of Health is in the process of aligning its enterprise architecture to the National Department eHealth strategy. This will set in motion the development and implementation of various eHealth initiatives across all levels of care that will seamlessly interface with the National Department of Health eHealth systems and strategy to enable systems interoperability. eHealth should give the department qualitative and timely health information to assist health care facilities in improving quality patient care. It should enable health care access to remote areas of the province through tele-medicine, and collaboration with specialists. Information Communication Technology (ICT) plays a vital role as an eHealth enabler.

Poor ICT infrastructure (equipment) in health facilities is the primary focus for ICT strategy to avoid downtime and not to dynamically drive ICT solutions within the eHealth spectrum. 87% of hospitals within the ECDoH has very limited to zero penetration of ICT networks and computer infrastructure provision have been made for the implementation of the eHealth project for the ECDoH over three (3) years to 28 highly litigated healthcare facilities. HMS2 electronic medical record system key features included patient registration that is integrated to the National Health Patient Registration System (HPRS), billing, and revenue management. A total of 532 of health facilities will be connected in the first phase of the project which is currently in progress over the Medium-Term Expenditure Framework (MTEF). The department has strengthened the strategic alliance with State Information Technology Agency (SITA) in leveraging the on-site prioritisation and timing together with SITA.

Revenue generation

Revenue generation // Cost Recovery takes place at the public health institutions where services are rendered. Public health revenue generation is a value chain that involves multi-stakeholders, namely patient administration (patient registration, patient records, ward clerks), clinical (consultation with patients and diagnosis thereof, recording of healthcare services rendered, pharmaceuticals) and finance (billing, and coding of services rendered, claims submission, debt management, cash management).

Revenue management at hospital level is a back end function, mainly dependent on inputs and activities from patient administration and clinical departments. The need to harmonise the stakeholders in this value chain is noteworthy.

The Department collects most of its revenue from patient fees for health care services rendered to the public. The fees are minimal for indigent patients and full tariffs are charged to funded patients including inter alia Road Accident Fund (RAF), Medical Aid Schemes, Correctional Services, SAPS,

Department of Justice (DOJ) and Compensation of Occupational Injuries and Diseases Act (COIDA). Of the above, most fees are collected from the RAF and DOJ.

There is a need to strengthen collections from the RAF, Medical Aid Schemes and other streams which are often missed due to incorrect classification of patients, prescription due to late billing, insufficient information to conclude claims and in some instances revenue due is not collected because of the inability to identify billable services.

The Department approved the implementation of the HMS² electronic medical record system in 2020. The HMS² system is currently being rolled out to 28 of the highest revenue collection hospitals as a patient administration and billing system. It is a free and open platform solution, developed in-house by the Information Technology Unit of the Department. Over time the HMS² system will be further extended to more hospitals in the Department.

Enhanced Revenue Collection

A number of events have converged to focus attention on government own revenue and, in particular, on the Eastern Cape Department of Health which is one of the departments that are showing the greatest potential to maximise provincial own revenue through inter alia: -

Revenue Source	Reference to Revenue Study
Patient fees: Enhanced billing - identification of patients for means test.	Efficiencies in collection of current revenue sources.
Healthcare establishment licensing applications	Registration (once off), licence renewal (annually) and annual inspection fees charged to all private hospitals / EMS in a province.
Enhanced amenities	Enhanced Amenities / Enhanced billing by ECDoH as designated service provider (DSP) – to Government Employees Medical Scheme (GEMS).
Rehabilitation Centres	The treatment of Road Accident Fund (RAF) patients in the public vs private health sector.
Enhanced Billing at Emergency Medical Services - road and air ambulance	Enhanced collections pre hospitalization / admittance from transporting of patients – targeted RAF patients.
Designated Service Providers	A Designated Service Provider (DSP) is a healthcare provider (doctor, pharmacist, hospital, etc.) that is a medical scheme's first choice when its members need diagnosis, treatment or care for a Prescribed Minimum Benefits (PMB) conditions. Enhanced billing is needed as there is demand from the medical aid schemes.
Psychiatric services	Increase the number of available Psycho-Legal evaluation beds in the province There is primarily only one hospital that conducts the majority of psycho-legal evaluations in the province.

Revenue Source	Reference to Revenue Study
High value equipment	Obtain revenue streams by renting out / leasing High Value Medical Equipment in non-peak hours. High Value equipment with maintenance contracts including Cardiology, Oncology, Haematology. CT Scanners, MRIs etc. could be rented in non-peak times to generate revenue.

1.3 Programme Resource Consideration

Table 11: Summary of payments and estimates by sub-programme: Programme 1: Administration

Total economic classification	590 629	716 793	773 703	798 917	802 452	780 131	988 331	944 840	968 548	26.7

Tables 11 and 12 above shows the summary of payments and estimates from 2020/21 to 2023/24 and over the 2024 MTEF period per sub-programme and economic classification. The programme's total expenditure increased from R590.629 million in 2020/21 to a revised estimate of R780.131 million in 2023/24. In 2024/25, the budget increases by 26.7 per cent from R780.131 million to R988.331 million when compared to the 2023/24 revised estimate due to additional funding for wage agreement and reprioritisation to fund the Digitation of E-Health and payment of Norton Rose for the legal services rendered in respect of medico legal claim.

Compensation of employees and goods and services, which make up current payments, are the major cost drivers of the programme. Compensation of employees shows a positive growth of 22.2 per cent from R414.911 million revised estimate to R507.133 million when compared to the 2023/24 due additional funding for wage agreement.

Goods and services shows a positive growth 39.2 per cent from R293.053 million to R407.956 million when compared to the 2023/24 revised estimate due internal reprioritisation for the Digitisation of ie-Health and payment of Norton Rose for the legal services rendered in respect of medico legal claim

Transfers and subsidies show a negative growth of 35.8 per cent from R3.283 million to R2.107 million when compared to the 2023/24 revised estimate due high revised estimate resulting from the payment of leave gratuities.

Payments for capital assets show a positive growth of 3.3 per cent from R68.884 million to R71.135 million when compared to the 2023/24 revised estimate due to low revised estimate.

I.4 Key Risks

The table below outlines the key risks.

Table 13: Key Risks and mitigating factors

Outcome	Risk	Mitigating factors
- Leadership and governance in the health sector enhanced to improve quality of care - Improve financial management - Reduced causes of medical legal claims in facilities by 80% - Quality of Health Service Improved	- Non-payment of creditors within 30 days - Budget cuts due to shrinking economy and increase in exchange rate for medicines and medico legal claims (not able to budget for) - Inadequate management of revenue - Inadequate provision of ICT (Information communication technology) services to support service delivery - Perpetration of fraudulent and corrupt activities - Delays in recruitment and inadequate retention of staff	- Monitor and strengthen implementation of Supplier Payment Plan. - Strengthen support visits and training. - Effective implementation and regular reporting on the audit improvement strategy. - Provincial and District Cost Containment Committee structures implementation of the resolutions of the Cost Containment meetings. - Allocation of resources as far as the budget allows, strengthen fees collection value chain, training and monitoring. - Maintain approval threshold. - Filling of vacant funded posts. - Monitoring compliance with the policies, procedures and SOPs. - Influence the prioritisation of the connectivity of health institutions with OTP. - Continued Improvement of consequence management. - Enforce compliance with the policies, procedures and SOPs. - Implementation of the resolutions of the meetings. - Conduct continuous staff training. - Software to validate patient income levels. - HR delegations register monitored monthly. - Recruitment time reduced to 3 months.

Outcome	Risk	Mitigating factors
		• HR Management Information System (HR MIS) in place. • Annual intake plan fully functional and updated annually. • Implementation of interventions to address staff attitude. • Maintain lower vacancy rate. • Strengthening deadline compliance for all reports and plans. • Staff are replaced within three months. • Registrar program remains operational. • The Special Employee Relations Training Unit is fully functional. • PILIR management outsourced to Metropolitan and SOMA. • Alignment of PERSAL to the organogram.
	Employees whose benefits are not paid within 3 months.	• Fast track payment of employee benefits • Ensure continuous trainings on capped leave are conducted at all districts. • Ensure timeous implementation of the statistical results detailed on the reports. • Implementation of meetings action list.
	Transition from the old to the new organogram.	• Conduct consultations with the relevant stakeholders. • Full implementation of migration plan and its terms of reference - ensure correct implementation of the organogram. • Approval of micro organogram.
	Lack of 100% Occupational Health and Safety compliance with statutory structures (H&S Reps and H&S Committees).	• Appointment of statutory structures (16.2 appointments, safety reps, fire. • Ensure compliance with employee wellness framework and reporting tool. • Programme marketing. • Ensure training and capacitation. • Ensure compliance with OHS policies and SOP's. • Develop OHS correction plan.
	Increased litigation	• Appointment of paralegal secretaries for deployment at districts and the targeted highly litigated facilities. • Contracting of medico legal expert firm to defend the cases in court.

Outcome	Risk	Mitigating factors
		- Contracting of the Special Investigation Unit (SIU) to investigate elements of fraud and corruption relating to theft of files. - Strengthen the quality of reports (adverse events reports). - Implementation of meetings action list.
	Inadequate contract management leading to medico legal claims	- Filling of vacant funded posts. - Communicating renewal of expiring contracts. - Implementation of meetings action lists - Enforce compliance with the Policies, Procedures and SOPs - All contracts must have SLAs. - Continuous monitoring and reporting on the existing contracts - Ensure proper management of contractual disputes. - Continuous monitoring and reporting on the existing Contracts and Dispute Registers. - Maintain updated contracts and dispute registers.
	Inadequate reporting of Contingent Liability	- Recruitment of staff. - Enforcement of the Service Level Agreement (SLA) between OTP and ECDOH, as well as State Attorney and Service Provider. - Develop an Accounting Policy Framework regarding the measurement and recognition of the Contingent Liability. - Implementation of meetings action list.

PROGRAMME 2

DISTRICT HEALTH SERVICES (DHS)

PROGRAMME 2: DISTRICT HEALTH SERVICES (DHS)

Programme purpose

To ensure the delivery of primary health care services through the implementation of the District Health System.

Programme description

The District Health Services (DHS) programme is responsible for the management of health services in the six (6) districts and two (2) metropolitans of the Province. The services offered are mainly preventive and minor curative, maternal, child and women's health and nutrition, HIV and AIDS, STI and TB (HAST), prevention and control of chronic diseases, public health / other community-based services such as waste management and coroner services. These are offered through the following service delivery platforms: Community Health Clinics, Community Health Centres (CHCs) and District Hospitals.

Based on the current structure, the DHS programme is composed of nine sub-programmes, namely:

- 2.1 District Management
- 2.2 Community Health Clinics
- 2.3 Community Health Centres (CHCs)
- 2.4 Community-Based Services
- 2.5 Other Community Based Services - Public Health
- 2.6 HIV & AIDS - STI and TB (HAST) Control
- 2.7 Maternal, Child and Women's Health & Nutrition
- 2.8 Coroner Services
- 2.9 District Hospitals

2.1 Sub – Programme: District Management

Sub-Programme purpose

The sub-programme manages the effectiveness, functionality and the coordination of health services, referrals, supervision, planning, monitoring & evaluation and reporting as per provincial and national policies and requirements.

Table 14: Outcomes, Outputs and Output indicators and targets for the next MTEF for District Management

Outcome (as per SP 2020/21-2024/25)	Outputs	Output Indicator	Audited/Actual performance			Estimated Performance	MTEF Targets

2.2 Sub-Programme: Community Health Clinics

Sub- Programme purpose

The sub-programme manages the implementation of the comprehensive Primary Health Care Service Package which is the provision of preventive, promotive, curative and rehabilitative care, in the 6 districts and 2 metros.

Table 15: Outcomes, Outputs and Output indicators and targets for the next MTEF for Community Health Clinics

Outcome (as per SP 2020/21- 2024/25)	Outputs	Output Indicator	Audited/Aual performance				Estimate d Performa nce	MTEF Targets

Explanation of Planned Performance over the Medium-Term Period:

Strengthen District Health Governance, Leadership & Management

- Monitor and facilitate compliance with the District Health Planning and Monitoring Standard Framework (DHPs & District Performance Reviews).
- Participation of District Health Management Team (DMT) in the District Development Plan (DDM) in each District Municipality to maximise integrated planning for delivery of services with high impact in communities.
- Governance of District Health System in the province will continue through District Management Teams, Provincial District Management Team (PDMTs) and participation by the department in the National District Health Steering Committee (NDHSC).
- Strengthened accountability, through establishment and functioning of District Health Council and Provincial Health Council, as well as clinic committees to enhance community involvement and participation in district health planning.
- Strengthening supervision of fixed PHC facilities through appointed supervisors, transport and ICT to enable continuous monitoring and reporting.

Improve Quality of Health Services in PHC facilities

- Health systems strengthening program will continue through the implementation of an Ideal Clinic status determinations on quarterly basis to enhance quality improvement plans (QIPS).
- Patient experience of care survey will be conducted in 80% of the facilities with focus on the six priority areas, (waiting times, cleanliness, infection control, safety and security, availability of medicine, staff attitudes) and development of QIPs.

Access to Primary Health Care Service package

- Improve access to medical doctor services at PHC facilities through the NHI health practitioner grant.
- Improve service package of CHCs by resourcing the clinical support services (rehabilitation services) in identified CHCs with spaces.
- Provision of mobile clinics in hard to reach communities.

2.4 Sub-Programme: Community Based Services – Disease Prevention and Control (Non-Communicable Diseases)

Sub – Programme purpose

The Community-based Services Sub-programme manages the implementation of the Community-Based Health Services. This includes:

- Implementation of disease-prevention strategies at a community level.
- Providing chronic and geriatric services including rehabilitation as a supportive service.
- Providing oral health services at a community level (including schools and old age homes).
- Strengthening the prevention of mental disorders, substance, drug, and alcohol abuse to reduce unnatural deaths.

Table 17: Outcomes, Outputs and Output indicators and targets for the next MTEF for Community Based services – Disease Prevention and control Non communicable diseases

Explanation of planned performance over the medium-term period

Non-communicable diseases (NCDs) continue to increase in the country as a result of changing lifestyles (reduced physical activity and increasing consumption of alcohol, foods high in salt and sugar). Both diabetes and hypertension contribute directly to the development of cardio- and cerebrovascular diseases which are becoming increasingly major causes of death in the Province. Eye health challenges which result from aging population and complications from NCDs are also noted to be prevalent in younger ages. Cataract and refractive errors contribute to poverty and poor economic development. The increasing cataract targets will be reached due to partnership with the Non-Governmental Organisations (NGOs) to support the cataract tours planned for the 2024/25 financial year. Youth, women and people with disabilities are inclusive in age groups 18 - 44 and 45 years and above for NCDs.

The National Strategy on Prevention and Control of NCDs 2022-2027, introduced NCD Cascade of 90 60 50 for hypertension and diabetes.:

- 90% of all people 18 years and over will know whether or not they have raised blood pressure and /or raised blood glucose.
- 60% of people with raised blood pressure or blood glucose will receive intervention.
- 50% of people receiving interventions are controlled.

Provincial targets issued by National Department of Health (NCDs) for NCD cascade are 90, 60, 50

Based on the National Indicator Data Set (NIDS) 2022, new indicator of positivity rate, which is calculated by the system was introduced. Positivity rate, which is the element of the 2nd cascade of 60% has a numerator of clients 18-44 years and 45 years and above (separately) screened and requiring / referred for hypertension and diabetes treatments, reported separately, with the denominator of clients screened each for different age bracket, which must be recorded once a month for statistics purposes. The target from 2023 is 5% as against the National target of 50%. Challenges include the following:

- The numerator of positivity rate is the new data element in the new National Indicator Data Set (NIDS) 2022.
- Duplicate recording of the screening element instead of once a month, according to NIDS definition.
- Inadequate data collecting tools.
- E-register challenged by network problems.
- Photocopying in some facilities make the register to be squeezed in an A 3 paper, thus reducing the columns and becoming faint resulting to improper recording.
- Poor understanding of the new data element (clients screened and requiring/ referral for treatment).
- Improper application of Adult Primary Care (APC) guidelines by nurses on the new data element (clients screened and requiring/ referral for treatment).

Planned interventions to manage these challenges include integrated management of NCDs (Community Health Workers (CHWs), Health Promotions, Nutrition, Training, etc in order to change individual behaviour towards

better health, screening and early detection, and those detected with the disease must be initiated on treatment and retained in care. The Universal Health Coverage will be significantly facilitated where health promotion and prevention of illness is able to increase awareness about the NCDs, reduce the numbers of people needing health interventions, and where good quality and person-centred care is provided within an integrated, effective and efficiently functioning health care system.

The cataract surgeries are done in established eye health units (Frontier, PE Provincial, CMH and NMA hospitals and some district hospitals through cataract surgeries outreach program. The support from the partners - South African National Council for the Blind (SANCB) and Grace Vision providing their resources (equipment, surgical consumables and medication) to improve cataract surgery rate for a period of 3 years. The cataract surgery rate target remains low and easily achieved by the department through the support of the SANCB. The challenge is that, the cataract surgery rate cannot be increased as the SANCB was not allocated any funding by their funders during 2023/24 financial year and the departmental eye units and district hospitals are not adequately funded to prioritise the eye care to procure cataract consumables, surgical and equipment for ease of outreach programs.

Planned intervention to manage eye health is to allocate enough funds for cataract consumables, procured centrally and distributed to eye units and some district hospitals where outreach will be offered.

The school going children and adults will be offered prescribed spectacles and readers through the approved provincial tender for a 3-year period in areas where the optometrists are appointed and also the support of Ke Ready organization contracted with the Department of Health for 6 districts.

2.5 Sub-Programme: Other Community Based Services - Public Health

Sub- Programme purpose

The Other Community Services sub-programme manages the devolution of municipal health service from the Department of Health to the districts and metropolitan municipalities, (health care waste management and other hazardous substances control).

Table 18: Outcomes, Outputs and Output indicators and targets for the next MTEF for Other Community Base Services – Public Health

Outcome (as per SP 2020/21 - 2024/25)	Outputs	Output Indicator	Audited/Actual performance			Estimated Performance	MTEF Targets

Explanation of Planned Performance over the Medium-Term Period

South Africa made its intentions clear to have a health system that provides universal access to healthcare. This system is based on the approach of keeping people healthy and caring for themselves when they are in poor health.

The government committed to strengthening the effectiveness of the health system highlighting the need to overhaul the health services delivery platform from one that is based on curative, high-cost care model, to one that promotes cost-effective PHC services that are delivered as close to communities and households as possible, and is centred around health promotion, prevention and community involvement. During the MTEF, the sub programme through its Ward-Based Primary Health Care Outreach Teams (WBPHCOTs) will perform the following duties which are aligned to the voted budget: in addition to the voted budget allocated for this sub programme, there will be assistance from the developmental partners for the following activities:

- Mobilising communities for screening (contact tracing).
- Visit households and advocate for accessibility to health services.
- Identify households with children, pregnant women, chronic and refer them to health facilities.
- Identify individuals who default treatment and refer to clinics in a welcome back campaign.

- Providing adherence support.
- Screening and testing for Non - Communicable Diseases (NCD) like hypertension and diabetes.
- Conduct testing in communities to identify pregnancy and refer them.
- Strengthen referral pathways to relevant services.

2.6 Sub-Programme: HIV & AIDS, STI & TB (HAST) Control

Sub – Programme purpose

To control the spread of HIV infection, reduce and manage the impact of the disease to those infected and affected in line with Provincial Development Plan (PDP) goals, and to control the spread of TB, manage individuals infected with the disease and reduce the impact of the disease in the communities.

Table 19: Outcomes, Outputs and Output indicators and targets for the next MTEF for HAST

/Outcome (as per SP 2020/21- 2024/25)	Outputs	Output Indicator	Audited/Actual performance			Estimated Performance	MTEF Targets

Explanation of planned performance over the medium-term period

The programme was meant to achieve 90-90-90 targets by end of March 2023 and transition to 95-95-95 from April 2023 as per UNAIDS goals, however these targets were missed by a significant margin due to various reasons of which the main was shortage of programme management staff at provincial and district levels.

Appointment for HIV programme management has been done, however, TB program still experiencing gross shortage at provincial and sub district level. Inputs have been submitted for incorporation to 2024/25 Annual Recruitment Plan (ARP). TB programme has adjusted the targets for 2024/25 based on the baseline for 2022/23. The 1st and 2nd 90s of the TB programme have been reached and targets have been adjusted to 95%, however, the 3rd 90 is still below 80%, therefore the baseline has been used to guide the targets.

The provincial HAST programme has intensified support to districts in the implementation of Operation Phuthuma (nerve centres), this approach facilitates data-driven and focused quality improvement therefore scaling up implementation of the case finding & retention strategies for TB, HIV and STIs.

TB Recovery Plan to address the discrepancies that happened during Covid-19 era is being implemented across the province. The plan focuses on upscaling 5 pillars: Communicate and Advocate; Find and Link; Treat and Retain; Prevent and Prepare; Monitor and Assess.

The programme plans to implement updated guidelines for both HIV and TB to improve clinical management of patients and programme performance to reach the 95-95-95 targets.

- 1st 95: Scaling up implementation of the case finding strategies for TB, HIV and STIs in order to close the minor gap by implementing Operation Phuthuma and TB Recovery Plan, the programme will ensure that demand creation takes place through communication and advocacy; intensify finding the missing TB and HIV cases through screening in health facilities and communities (TB health-check, HIV self-screening, and digital chest x-ray) and link them to care. Continue to improve diagnostic yield by implementing the use of GeneXpert Ultra and of Lipoarabinomannan Assay Policy (LAM) policies for TB as well as Index Testing and HIVSS for HIV to improve the expected positivity rate. In the TB sub-programme, key populations who are regarded as high risk are tested despite

TB screening results and comprise of all household TB contacts including adolescents and adults, ex-TB patients, HIV positive, pregnant women, ex-miners and uncontrolled diabetics. For HIV positive people where TB is excluded, the implementation of TB Preventative therapy (TPT) will be intensified and has been extended to 14 weeks HIV positive clients, which is an addition to adults and adolescents to prevent the progression of latent TB to active TB. TB-HIV integration program ensures that all TB diagnosed patients know their HIV status, the HIV positive diagnosed are started on ARV treatment for comprehensive care. The HIV diagnosed clients are screened for TB and tested using GeneXpert test irrespective of TB symptoms, TB positive diagnosed clients are started on TB treatment.

- 2nd 95: The focus is to have 95% of people with confirmed HIV or drug susceptible TB (DS-TB) initiated on treatment, whether confirmed clinically or bacteriologically. For multidrug resistant TB (MDR), Bedaquilline, Pretonamide, Lenozinade and Levofloxacin (BPAL-L) have been introduced as the shortened 6 months regimen following the successful study conducted in Nelson Mandela Metro and Buffalo City Metro. . BPAL-L roll-out to other districts is planned for 2024/25 financial year, the regimen is hoped to increase retention on treatment due to less pill burden and reduced treatment course.
- The World Health Organization (WHO) proposed that it be implemented worldwide as the recommended regimen and was first launched and implemented on the 1st of September 2023 in Nelson Mandela Metro. Adherence counseling at each encounter and patient education through media engagements are offered.
- Tracking and tracing the lost to follow up clients through the community-based intervention teams, monitoring of indicator performance in partnership with various stakeholders.
- 3rd 95: The province will strengthen intervention to ensure good treatment outcome for both TB and HIV that will achieve 95% treatment successes. Treatment success will be monitored by strengthening management of viral load and sputum tests on scheduled intervals in line with the guidelines.
- Patients on ART that are treated successfully, with suppressed viral load will be enrolled into Differentiated Models of Care (DMC), to collect their medication either in Facility Pick-up Points, Community Pick-up Points or Adherence Clubs. This intends to reduce the facility congestion where stable patients can access their medication outside the facilities.

2.7 Sub – Programme: Maternal, Child and Women’s Health and Nutrition (MCWH&N)

Sub – Programme purpose

To reduce mother, new born and child mortality through strengthened maternal and child as well as nutrition health services across the Eastern Cape Province.

Explanation of planned performance over the medium-term period

The sub-programme is continuously dedicated to provide equitable maternal, neonatal, child health, nutrition and sexual reproductive health services to all targeted groups regardless of sex, age and disability status. The Department has reduced maternal deaths as a result intervention to improve the skills of health professionals like Essential Steps in Managing Obstetric Emergencies (ESMOE), Basic Antenatal Care (BANC) and K2 trainings which covered a significant number of clinicians in all districts.

In recent years, hypertension has been a leading cause of maternal deaths but that has since changed due to implementation of management of hypertension during and post pregnancy guidelines. Currently the leading causes of maternal deaths as per the recent audited report include HIV and TB.

To address this challenge there is an increased effort to screen all women of reproductive age at a community and facility level to boost early booking of pregnant women before 20 weeks. This will be done to achieve early identification of pregnant and HIV infected women to minimise pregnancy-associated complications, identify congenital birth defects, Prevent Mother-to-Child Transmission (PMTCT) and promote early access to termination of pregnancy services.

Strengthening of access to quality antenatal care services by pregnant mothers is critical for the early enrolment of HIV positive mothers to antiretroviral therapy programme. All pregnant mothers are screened for TB to reduce complications that could result from the infection. The HIV negative pregnant women are encouraged to take pre-exposure prophylaxis (PrEP) to prevent infection during pregnancy stage

The Province has clustered district hospitals to conduct safe caesarean sections to assist with resource sharing, reduction of distances travelled by inter-facility obstetric ambulances to reduce the mortalities. Furthermore, the following interventions are planned for the next five years; Improving and maintaining effective clinical skills levels through structured skills training and mentoring and proper placement and retention of competent clinical staff.

The Department will link interventions to strong clinical accountability and governance through the District Clinical Specialist Teams. Primary level and community-based services are intended to impact directly on the demand side of patient care-seeking behavior in terms of educating mothers or caregivers to make use of preventive and curative services to improve health

The Province is planning to increase access to neonatal units to reduce overcrowding in the existing units and also strengthen outreach services by neonatologists and neonatal nurses. There is equipment that has been procured to boost functioning of neonatal units. Helping Babies Breathe(HBB) project in O.R Tambo district funded by Prof Sithembiso Velaphi is continuing covering five hospitals(St. Barnabas, Dr. Malizo Mpehle, St. Elizabeth, Mthatha General and Nelson Mandela Academic Hospitals).

In an effort to reduce teenage pregnancy, family planning is key in curbing the challenge including risks associated with unwanted teenage pregnancies. This will be achieved through collaborating with tertiary institutions to improve access to sexual reproductive health services by students on campus. A signed memorandum of understanding (MOU) is in place between Department of Health and Institutions Higher learning.

Sexual reproductive health trainings will be conducted in all six districts and two metros to capacitate clinicians in all facilities. The Province is establishing youth zones in health facilities to improve the appeal of Sexual Reproductive Health services to the youth. The department is currently working with United Nations Population Fund Agency (UNFPA) and Beyond Zero (NGO) to improve sexual reproductive health services and to revive the Nzululwazi project in Alfred Nzo District.

In an effort to reduce under five child mortality rate, Expanded Programme on Immunisation (EPI) catch-up drives are conducted to improve immunisation coverage. The Province will further continue with supporting the districts that are underperforming including hard to reach areas, and monitor effective analysis and verification of data.

There has been significant changes in the EPI schedule introduced by the National Department of Health with effect from January 2024. In pregnant women, Tetanus Toxoid (ATT) vaccine has been replaced by Tdap to boost antibodies that will be passed to unborn babies to prevent possible infection. In children under the age of five years, measles vaccine to measles and rubella combined vaccine. Hepatitis B vaccine has also been introduced as a vaccine for administration at birth to babies birthed by Hepatitis positive mothers during pregnancy.

Cold chain management will continue to be improved by ensuring proper storage of available vaccines through procurement of specialised vaccination refrigerators and continuous temperature monitoring devices. Integration of EPI and HIV is implemented in the facilities to improve management of children on antiretrovirals.

The department will continue facilitating Integrated Management of Childhood Illnesses (IMCI) and Integrated Management of Children with Acute Malnutrition (IMAM) trainings to reduce child mortality rate. To address social determinants of health associated with malnutrition and diarrhoea, inter-sectoral collaboration will be strengthened.

Child malnutrition continues to be a problem in the Eastern Cape Province due to poverty and high unemployment rate. While that is the case, case fatality rate due to severe acute malnutrition (SAM) was reduced from 8.6% to 7.6% in the financial years 2020/21 to 2022/23 respectively. This indicated better management of sick SAM cases admitted in hospitals, however the number of children diagnosed with malnutrition remains high.

The child malnutrition incident rate in the Province compelled South Africa Human Rights Council(SAHRC) to hold an enquiry to establish causes and role of various departments in reducing and managing child malnutrition. The inquiry was conducted in August 2022 with relevant departments including Social Development, Department

of Rural Development and Agrarian Reform (DRDAR), Basic Education, Home Affairs, Gogta and others. Post the inquiry, SAHRC released a report with recommendations for all relevant departments. As part of the recommendations, the Department of Health had to strengthen early identification of children at all levels of care, strengthen interventions targeting Early Childhood Development (ECD) programmes, availing child malnutrition database for children with child malnutrition for easy access by stakeholders for their planned interventions.

Inter-sectoral collaboration is critical in addressing social determinants of health associated with child malnutrition. Currently Department of Social Development is facilitating all relevant sector departments to address the underlying causes of food insecurity and poverty, through anti-poverty and mother-child development programme. There are also health education activities covering important elements (nutrition in pregnancy, hygiene, handwashing, breastfeeding and infant feeding) which influence the adoption of healthy practices. In the Eastern Cape, teenage pregnancy and HIV infection contribute to the exclusive breastfeeding rate that are consistently below 50% which is a target set by World Health Organisation. The Mother Baby Friendly Initiative (MBFI) programme will be strengthened to improve breastfeeding rates in an effort to reduce child malnutrition.

2.8 Sub-Programme: Coroner Services

Sub-Programme Purpose

- To strengthen the capacity and functionality of forensic pathology institutions within the province and facilitate access to forensic pathology services at all material times.
- The Coroner Services sub-programme renders forensic pathology services in order to establish the circumstances and causes surrounding unnatural deaths.

Table 21: Outcomes, Outputs and Output indicators and targets for the next MTEF for Coroner Services

Outcome (as per SP 2020/21- 2024/25)	Outputs	Output Indicator	Audited/Actual performance			Estimated Performance	MTEF Targets						
			2020/21	2021/22	2022/23	2023/24	2024/25	2024/25 Quarterly Targets				2025/26	2026/27
								Q1	Q2	Q3	Q4		
6. Quality of health services improved	All post mortem cases finalised	6.4.5 Percentage of post – mortem performed within 72 hours	96.9%	97.7%	95%	95%	98%	98%	98%	98%	98%	98%	98%

		Denominator	9 839	2 972	10 897	3 579	10 897	2 724	2 725	2 724	2 724	10 897	10 897

Explanation of Planned Performance over the Medium-Term Period

Coroner services will improve capacity of the staff through recruitment of forensic pathologists and training of medical officers and forensic pathology officers. Expansion of forensic pathology service sites across the province (new dissecting facility at Ngcobo, opening of holding facilities at Dutywa, Port Alfred, Thafalofefe and Molteno) with procurement of disaster truck per region, additional body collecting vehicles and installation of Lodox Machines.

Infrastructure improvements include redesigning and reconstruction of frontline offices at all dissecting facilities, construction of visitor's holding/waiting rooms and counselling facilities and installation of technological and innovative features to control body movement and prevent body loss. The forensic pathology suites need to increase security and install maximum-security features. Forensic officers deal with major trauma and provision of trauma debriefing services and counsel is a priority. Improve cooperation and coordination of un-identified and unclaimed bodies through stakeholder's management and facilitate paupers' burial processes

2.9 Sub Programme: District Hospitals

Sub-Programme Purpose

To provide comprehensive and quality district hospital services to the people of the Eastern Cape Province through implementation of the District Hospital Package.

Table 22: Outcomes, Outputs and Output indicators and targets for the next MTEF for District Hospitals

Outcome (as per SP 2020/21- 2024/25)	Outputs	Output Indicator	Audited/Actual performance			Estimated Performance	MTEF Targets

Explanation of planned performance over the medium-term period

The bed utilisation rate is affected by the decline in burden of diseases such as TB which is now manageable at community level. The patients are not keen to go to smaller hospitals where there are no specialists medical interventions. It has declined gradually over the past years. Currently the province has a high number of district hospitals with poor efficiencies and thinly spread resources with direct referral into the expensive higher-level facilities.

To increase maternity waiting beds for high risk patients so that they are closely observed until delivery. Improvement will be sought through finalisation of the optimisation process.

Patient Experience of Care survey is a critical initiative to source feedback from the service users to establish the level of satisfaction. There has been non-compliance with regards to six ministerial priority areas especially Infection Prevention & Control. The department is concentrating on improving laundry services, availability of hand wash facilities, procurement of linen patient clothing and hand wash facilities is part of the endeavours to improve patient satisfaction.

Handwash drives is one of the strategies to ensure that health personnel are aware of the impact of proper handwashing to prevent health acquired infections that can result in medico legal lawsuits

Patient Safety Incidents reporting has improved significantly through strengthening of Clinical Governance, inculcating the culture of timeous reporting and management of Patient Safety Incidents when they arise. Continuous trainings will be conducted, and overseeing that clinical audits are conducted to prevent occurrence and recurrence of patient safety incidents.

To fully utilise the Ideal hospital realisation tool as an important vehicle for the hospitals to assess performance periodically, identify gaps and develop turnaround strategies for poor/non-performance.

To improve maternal and child health through constant vigilance by conducting clinical audit as part of prevention strategy to curb the mortality rate and reduce Patient Safety Incidents.

Increasing the number of maternal waiting beds for high risk pregnant women will be key for close observation and management before delivery.

Enhancing growth monitoring through clinical governance structures within the facility by prioritising essential equipment. Forging relations with PHC facilities in the catchment population for community engagement and education regarding malnutrition and childhood illnesses.

Total economic classification	15 075 401	15 094 877	15 077 221	14 188 408	14 757 701	15 649 758	15 568 003	15 595 451	16 602 937	(0.5)

Tables 23 and 24 above show the summary of payments and estimates for District Health Services per sub-programme and economic classification. The programme's total expenditure increased from R15.075 billion in 2020/21 to a revised estimate of R15.649 billion in 2023/24. In 2024/25, the budget decreases by 0.5 per cent from R15.649 billion to R15.568 billion when compared to the 2023/24 revised estimate due to fiscal consolidation.

Compensation of employees and goods and services, which make up current payments, are the major cost drivers of the programme. Compensation of employees shows no growth from R10.819 billion to R10.824 billion when compared to the 2023/24 revised estimate due to high revised estimate as a result of wage agreement, as well as 2024/25 additional funding for wage agreement and appointment of Post Community Services Worker.

Goods and services show a positive growth of 1 per cent from R4.365 billion to R4.408 billion when compared to the 2023/24 revised estimate due to high revised estimate resulting from payments of accruals and payables, as well as additional funding for Medicine, Fleet and Medical Supplies.

Transfers and subsidies show a negative growth of 45.7 per cent from R276.005 million to R149.993 million when compared to the 2023/24 revised estimate due to high revised estimates in 2023/24 as a result of payment of medico legal claims.

Payments for capital assets show a positive growth of 2.2 per cent from R181.260 million to R185.333 million when compared to the 2023/24 due to funds reprioritised for medical equipment to monitor high risk pregnancies, new-borns and children such as incubators, CPAP compressors and diagnostic sets.

2.11 Key Risks

The table below outlines the key risks.

Table 25: Key Risks and mitigating factors

Outcome	Risk	Mitigating factors
- Leadership and governance in the health sector enhanced to improve quality of care - Quality of health services improved. - Morbidity and Premature mortality due to non-Communicable diseases reduced - Community engagement improved - Morbidity and premature mortality due to communicable diseases reduced - Maternal, Neonatal, Infant and Child Mortality reduced. - Stunting among children reduced	- Lack of leadership in coordination of Primary Health Care Services at sub district level - Non adherence to National Guidelines and Policies on management of TB, HIV & AIDS and STI patients resulting to inadequate management of client with HIV, TB & STI	- Filing of funded strategic posts In the ARP. - Strengthened Infection Prevention and Control strategies. - Conduct monitoring support visits to districts and facilities quarterly. - Twelve decentralised sites to be converted to fully fledged MDR sites with the necessary resources. - Conduct HAST awareness campaign roadshows in all districts/metros. - Conduct a comprehensive training of HAST Programmes for the Outreach Teams. - Enforce compliance with policies, procedures and SOPs. - Continuous monitoring and analysis of patient data reports.
	High Maternal and Perinatal Mortality Rate	- Implementation of the quarterly community mobilisation and education in each district. - Revive & strengthen District Hospital Neonatal units (increase resources and training). - Establishment of rehabilitation units for children with Cerebral Palsy in priority hospitals. - Implementation of prioritised posts in Annual Recruitment Plan.

Outcome	Risk	Mitigating factors
		Conduct monitoring support visits and continuously monitoring the trends from the analysis reports. • Implementation of meetings action list
	• High Child Mortality Rate	• Continuous training and capacitation of staff personnel on Child Health Policy Guidelines. • Monitoring the implementation of immunisation catch-up campaigns. • Conduct monitoring support visits to priority Institutions. • Ensure monitoring and implementation of the Annual Recruitment Plan. • Implementation of meetings actions list.
	• Challenges with prevention, early detection and management of Non-Communicable and Chronic Diseases.	• Continuous training and capacitation of staff on management of chronic diseases. • Implementation of meetings actions list.

PROGRAMME 3

EMERGENCY MEDICAL SERVICES (EMS)

Province of the
EASTERN CAPE
HEALTH

PROGRAMME 3: EMERGENCY MEDICAL SERVICES (EMS)

3.1 Programme Purpose

To render quality and efficient prehospital emergency services, inter-hospital transfers and planned patient transport services. Based on the current structure, Emergency Medical Services has two sub-programs.

Sub-Programme 3.1: Emergency Transport: The sub-program is solely for emergency incidents (prehospital care and inter-hospital transfer) and has components that underpin its functionality:

- Communication Services: Call taking and dispatching of emergency calls.
- Road ambulances and Aeromedical Services: modes of patient transport to definitive care.
- Specialised Services: Medical Rescue and Disaster Management.
- Inter facility transfers of patients between health facilities

Sub-Programme 3.2: Planned Patient Transport: The sub-program deals with non-emergency transport of booked outpatients to referral centre and patients referred to step-down facilities.

- This includes all ECDOH outpatient referral pathways: inter-district, intra-district and inter-provincial referrals.
- Pre booking is essential to map out drop off and pick up points for outpatients.

Sub-Programme: Emergency Transport

Sub-Programme Priorities

- Increase number of licensed ambulances and bases in accordance with EMS regulations (Ideal EMS status).
- Rollout of computer aided dispatch system and monitoring of call escalation rate.
- Maintain functional multi- sectoral committee for disaster management.
- Continue implementation of record emergency calls management systems.
- Ensure optimal utilisation of air ambulance services

Sub-Programme: Planned Patient Transport

Sub-Programme Priorities

- Deployment or appointment of dedicated planned patient transport staff.
- Implementation of optimal fleet management system

Table 26: Outcomes, Outputs and Output indicators and targets for the next MTEF for Emergency Medical Services (EMS)

Outcome (as per SP 2020/21- 2024/25)	Outputs	Output Indicator	Audited/Actual performance			Estimated Performan ce	MTEF Targets

Explanation of planned performance over the medium-term period

The programme has developed a plan to improve performance in the response rate for priority one calls, inter-facility transfers, and planned patient transport services. These three components of the programme rely on a functional communication system, availability of adequately skilled staff in the category of emergency care officers, and appropriate equipment for management of patients, and the availability of appropriately configured vehicles for emergency medical care.

Improving response times for priority I calls in both rural districts and urban metropolitan municipalities has a direct contribution to the provincial goal of improving the quality of health care for all residents of the Eastern Cape. The priority I calls mainly include the maternal and neonatal care, cardiac related incidents, and trauma incidents. The ability to respond to these incidents by qualified emergency care practitioners, with appropriate equipment will ensure that the quality of health care provided to the community and residents of the Eastern Cape is of the highest standard. Since the majority of priority I cases required advanced skills in emergency care, the department will invest in increasing the number of paramedics that have specialised skills to manage emergencies. The placement of these paramedics will prioritise the rural districts such as Alfred Nzo, Joe Gqabi, Amathole, OR Tambo, and Sarah Baartman.

Other resources allocated to improve response times to priority I calls include the air ambulance (helicopter ambulance and the fixed wing aircraft). The helicopter will operate from Nelson Mandela Metro, Buffalo City Metro, and OR Tambo district. These locations will be the main points while the service would be available for the whole province, western districts, central/northern districts, and eastern districts respectively. The service will be despatched to highly critical emergencies especially in hard to reach parts of the province where road transfer would take longer hence compromising the outcomes of care. The programme will also utilize a fixed wing air ambulance service on an ad hoc basis to transfer patients to specialist hospitals in the Western Cape and Kwa-Zulu Natal provinces.

Decentralisation of ambulances resources closer to communities is also planned for expansion in the medium term. This strategy is guided by the national norm of one ambulance to a population of 10 000. The programme has started utilizing global positioning system (GPS) that coordinates to review current location of EMS bases around the province. This analysis seeks to link the EMS bases with the community and the referral health facility. The next phase will then consider the rational location of bases to ensure proximity to the communities and referral health facilities. In addition to the population, the programme is including the geographical size of the area as this also has an impact on the response time. Once the implementation of this strategy is completed, then the response time will be shorter as ambulances when dispatched will be from the local base closer to communities.

A second approach to decentralization involves the allocation of dedicated ambulances at priority hospitals for inter-facility transfers. The programme has started the process of placing ambulances at high volume hospitals to deal with referrals (upwards and downwards) and discharges. Inter-facility transfers account for the largest volume of cases handled by EMS, often greater than 30% per quarter. These cases are mainly patients being referred to the next level of care and also discharges from higher levels of care to district hospitals. An increase in inter-facility transfer cases leads to a delay in responding to pre-hospital emergencies from the community. The programme has introduced an approach to allocate ambulances at selected hospitals to respond exclusively to inter-facility transfer cases. Already there is an ambulance placed at Nelson Mandela Academic Hospital for referrals between NMAH, Mthatha Regional Hospital, and Bedford Orthopaedic Hospital. A similar service is provided in health centres in Gqebera to move critical patients from the health centre to either Livingstone Tertiary or Dorah Nginza Regional hospitals. Over the medium term, the programme will expand the service to other hospitals in the 28 priority hospitals list, starting in this financial year with Butterworth, Bhisho and Grey and Tafalofefe hospitals.

The programme is planning to improve the coordination and planning of the planned patient transport services which moves stable patient for reviews and assessment to regional, tertiary and specialised hospitals. There is a need to make the booking system and route planning to be electronic hence making it visible to all clinical users. The Planned Patient Transport (PPT) service remains an essential component in bringing patients to services.

The rollout of the electronic call taking and dispatch solution will be completed in this financial year. The programme has invested in the computer equipment and infrastructure, and customising the solution for the electronic call taking and dispatch solution over the past year. Additional call takers were appointed and trained on call taking and dispatch at the EMS College in Gqebera. Network connectivity challenges, both local and wide area network have been addressed at the identified locations for the rollout. Interoperability with other applications such as the vehicle tracker has been completed. The remaining period of this project will then be dedicated to rolling out the solution and deal with possible maintenance requirements. Call takers and dispatchers at the EMS communication centres will continue to be trained on the solution and also supported to efficiently provide the quality customer care and provision of EMS resources to the community.

The frequent telephone network outages due to power blackouts and cable theft tend to compromise the community access to the EMS communication centres. The programme will formalize a system to divert calls when there are network disruptions to the shared contact centres of the department, and also explore the utilization of the SA Police Services lines and the disaster management call centres at respective districts. This is done to ensure minimal inconvenience to the community when they need an ambulance. Long term solutions to the power outages and cable theft problem will be explored broadly as part of the government interventions.

The programme is also taking significant strides to ensure compliance with the Emergency Medical Services regulations (Health Act 61 of 2003 as amended). Over the medium term, the department will allocate resource to refurbish the EMS stations to provide appropriate wash bays and compliance with occupational health and safety standards. The upskilling of staff from the basic life support category to higher levels will be supported by the human resource development programme.

The successful achievement of the targets in programme 3 also required cooperation with such stakeholders as local community leaders and the police to protect the staff when responding to emergencies.

The programme has been recording an increase in the number of calls for ambulances and this is putting pressure on the limited resources available. The department will embark on a programme to educate communities about utilization of ambulance services and the type of cases and incidents that should require an ambulance. This will also reduce the number of non-emergency cases that are referred to the ambulance services

The programme is planning to improve the coordination and planning of the planned patient transport services which moves stable patient for reviews and assessment to tertiary and specialised care. There is a need to make the booking system and route planning to be electronic hence making it visible to all clinical users. The PPT service remains an essential component in bringing patients to services. The programme will engage with programme 4 and 5 to increase the number of outreach services which bring specialist care to the patients in their local communities. The chronic medicines dispensing and distribution (CCMDD) will make medicines accessible closer to the patients without having the patient travelling long distances to collect their refills of prescribed medicines,

The successful achievement of the targets in programme 3 also required cooperation with such stakeholders as local community leader and the police to protect the staff when responding to emergencies.

3.2 PROGRAMME RESOURCE CONSIDERATION

Table 27: Summary of payments and estimates by sub-programme: Programme 3: Emergency Medical Services

R thousand	Outcome			Main appropriation	Adjusted appropriation 2023/24	Revised estimate	Medium-term estimates			% change from 2023/24

Payments for financial assets	-	-	-	-	-	-	-	-	-	-
Total economic classification	1 272 046	1 353 522	1 452 877	1 507 673	1 519 607	1 381 840	1 562 632	1 634 533	1 645 637	13.1

Tables 27 and 28 above show the summary of payments and estimates for Emergency Medical Services per sub-programme and economic classification. The programme's total expenditure increased from R1.272 billion in 2020/21 to a revised estimate of R1.381 billion in 2023/24. In 2024/25, the budget increased by 13.1 per cent from R1.381 billion to R1.562 billion when compared to the 2023/24 revised estimate due to low revised estimate and 2024/25 additional funding for wage agreement.

Compensation of employees shows a growth of 9.8 per cent from R1.059 billion to R1.163 billion when compared to the 2023/24 revised estimate due to additional funding for wage agreement.

Goods and services show a growth 53.2 per cent from R178.322 million to R273.185 million when compared to the 2023/24 revised estimate due to low revised estimate attributed to reprioritisation of funds from Goods and services in 2024/25 to alleviate cost pressures on fleet management under Capital.

Transfers and subsidies show a growth of 5.9 per cent from R3.980 million to R4.216 million when compared to the 2023/24 revised estimate due to low revised estimate as a result of reduced payments made for leave gratuities.

Payments for capital assets show a negative growth of 12.9 per cent from R140.157 million to R122.090 million when compared to the 2023/24 revised estimate due to high revised estimate attributed to fleet management payments.

3.3 Key Risks

The table below outlines the key risks.

Table 29: Key Risks and mitigating factors

Outcome	Risk	Mitigating factors
Quality of health services improved.	- Inadequate EMS Services - Delayed repairs - Poor road infrastructure - Attacks on EMS umbalance crew	- Filling of funded strategic posts. - Ensure the implementation of the electronic call taking dispatch system. - Increase the number of functional vehicles suitable for the rural terrain. - Integrated quarterly management and human capital (supervision, labour relations, development). - Establish a formal memorandum of understanding between DOH/EMS and provincial SAPS and Transport.

PROGRAMME 4

PROVINCIAL HOSPITAL SERVICES

Province of the
EASTERN CAPE
HEALTH

PROGRAMME 4: PROVINCIAL HOSPITAL SERVICES (REGIONAL AND SPECIALISED)

4.1 Programme Purpose

To provide cost-effective, good quality secondary hospital services and specialised services, which include psychiatry and TB hospital services.

Sub-Programme 4.1 - General (Regional) Hospitals

General (Regional) Hospital Services: Rendering of hospital services at general specialist level and providing a platform for research and the training of health workers:

- Cecilia Makiwane
- Frontier
- St Elizabeth
- Dora Nginza
- Mthatha

Sub-Programme 4.2 - Tuberculosis (TB) Hospitals

TB hospital Services: To convert current tuberculosis hospitals into strategically placed centres of excellence in which a small percentage of patients may undergo hospitalization under conditions that allow for isolation during the intensive phase of treatment, as well as the application of the standard multi-drug resistant (MDR) protocols:

- Jose Pearson
- Nkqubela
- Majorie Parish
- PZ Meyer
- Majorie Parks
- Winter Berg
- Khotsong

Sub-Programme 4.3 - Psychiatric / Mental Hospitals

Psychiatric Mental Hospital Services: Rendering a specialist psychiatric hospital service for people with mental illness and intellectual disability and providing a platform for training of health workers and research:

- Elizabeth Donkin Psychiatric hospital
- Komani Psychiatric hospital

- Tower Psychiatric hospital – provide long-term.
- Cecilia Makiwane hospital acute psychiatric Unit
- Holy Cross hospital acute psychiatric Unit
- Mthatha Regional hospital acute psychiatric Unit
- Dora Nginza hospital: 72-hour observation Unit

4.3 Sub – Programme: Psychiatric / Mental Hospitals

Sub- Programme Priorities

- Development of District Mental Health Specialist Teams.
- Creating mental health units in district, regional and tertiary hospitals.
- Screening of mental health patients at PHC and district levels.
- Re capacitation of the clinical health professionals on mental health programmes.

Table 32: Outcomes, Outputs and Output indicators and targets for the next MTEF for Psychiatric / Mental Hospitals

Explanation of planned performance over the medium-term period

The vacant and critical leadership positions of two regional hospital chief executive officers at regional hospitals (Dora Nginza and St Elizabeth hospitals) pose a threat to leadership and governance. Governance and leadership will be improved through the appointments and filling of these vacant posts including clinical governance management heads at regional hospitals.

Furthermore, community engagements will be improved with the establishment of all hospital boards in line with the revised guidelines for the next 3 years according to the hospital board policy.

The migration processes towards the reclassification of Albertina Oliver Tambo district hospital into a regional hospital in lieu of regulations relating to categories of hospitals gazette. This in turn would require funds to follow the programme function, and the hospital budget be re-allocated under the programme 4.1 BAS Budget Sub-Programme Allocation.

Similar alignment would have to be configured in all the transversal systems, and the reporting structure would fall under the Chief director Hospitals Services within the Regional Hospitals. Re-establishment of clinical training platforms in hospitals will be prioritized so as to strengthen clinical training for nurses.

4.5 PROGRAMME RESOURCE CONSIDERATION

Tables 33 and 34 above show the summary of payments and estimates for Provincial Hospital Services per sub-programme and economic classification. The programme's total expenditure increased from R3.980 billion in 2020/21 to a revised estimate of R4.196 billion in 2023/24. In 2024/25, the budget shows an increase of 0.8 per cent from R4.196 billion to R4.231 billion when compared to the 2023/24 revised estimate due to additional funding for wage agreement and cost pressures on non-CoE.

Compensation of employees shows a negative growth of 7.3 per cent from R3.327 billion to R3.085 billion when compared to the 2023/24 revised estimate resulting from the 2023/24 wage agreement.

Goods and services show a growth of 36.5 per cent from R743.275 million to R1.014 billion when compared to the 2023/24 revised estimate due to additional funding of core items and internal reprioritisation to fund cost pressures for National Health Laboratory Services (NHLS), medical supplies, municipal services and chronic psychiatric care.

Transfers and subsidies show a negative growth of 46 per cent from R113.034 million to R60.991 million when compared to the 2023/24 revised estimate due to a high revised estimate resulting from payment of Medico Legal Claims.

Payments for capital assets show a growth of 514.2 per cent from R11.406 million to R70.051 million when compared to the 2023/24 revised estimate, due to low revised estimate.

4.6 Key Risks

The table below outlines the key risks.

Table 35: Key Risks and mitigating factors

Outcome	Risk	Mitigating factors
- Quality of health services improved. - Maternal, Neonatal, Infant and Child Mortality reduced	Non-adherence to policies and guidelines on referrals and services between Primary, Secondary and Tertiary Services.	- Implementation of the referral policy / protocol. - Strengthen the clinical services platform.

Outcome	Risk	Mitigating factors
Morbidity and Premature mortality due to Non-Communicable diseases reduced		- Ensure timeous filling of critical and replacement posts. - Enforcement of policies and SOPs. - Implementation of the meeting resolutions. - Strengthen the quality of reports. - Procurement of appropriate healthcare technology as per APP.

PROGRAMME 5

CENTRAL & TERTIARY HOSPITALS

Province of the
EASTERN CAPE
HEALTH

PROGRAMME 5: CENTRAL & TERTIARY HOSPITAL SERVICES

Sub-programme 5.1: Central Hospital Services

Central Hospital: Nelson Mandela Academic Hospital

Sub-Programme Purpose

To strengthen and continuously develop the modern tertiary services platform to adequate levels to be responsive to the demands of the specialist service needs of the community of the Eastern Cape Province. There are two Tertiary Hospitals (Frere and Livingstone hospitals) and one Central hospital (Nelson Mandela Academic) in the Eastern Cape Province:

Sub-Programmes 5.2: Provincial Tertiary Hospital Services

- Livingstone hospital
- Frere hospital

Sub-Programme Purpose

To strengthen and continuously develop the modern tertiary services platform to adequate levels in order to be responsive to the demands of the specialist service needs of the community of the Eastern Cape Province. There are two tertiary hospitals in the Eastern Cape Province:

Table 37: Outcomes, Outputs and Output indicators and targets for the next MTEF for Provincial Tertiary Hospital Services

Explanation of planned performance over the medium-term period

The vacant and critical leadership positions of chief executive officers at central and tertiary hospitals pose a threat to leadership and governance. The Department is in the process of filling the leadership positions including the clinical governance of the institutions. Furthermore, community engagements is sustained through effective and functional hospital boards.

The department has continued procuring advanced health technology equipment to improve the quality of life of the Eastern Cape Province. There is significant progress regarding the development of oncology and radiotherapy services at the Nelson Mandela Academic hospital in Mthatha.

The award for the construction of the oncology project, and support facilities inclusive of the procurement of the state of the art Linear Accelerator machine and other related equipment, has been awarded and the architectural designs for plumbing being finalised. The construction onsite is expected in May 2024. Meanwhile the provision of chemotherapy services is functional at the NMAH Centre of Excellence Sir Henry Site and plans are underway to strengthen and further extend outreach to identified sites in the surrounding OR Tambo and Alfred Nzo districts. This will drastically reduce the number of patients that have to travel from Mthatha to be assessed and seen at Frere hospital in East London.

Nelson Mandela Academic Hospital remains committed in working toward providing a full package of a central hospital through continuous development of sub-specialties . Flagship programmes i.e. cochlear implant surgical services and rehabilitation as well as cathlab services are still running well . A clinical technologist has been appointed to ensure full utilization of cathlab.

Some of the projects in progress include:

- building of a state of the art dental lab currently under construction to ensure provision of full dental lab service package
- Repurpose an identified space for embryology laboratory .
- Building oncology complex that will take care of in/out patients and offer chemotherapy and radiation services .
- Records management (a memorandum of understanding has been signed with National Department of Public Works and Infrastructure for utilisation of Mthatha Airport Hangers for archiving of medical records).
- Collaboration with other stake holders (memorandum of understanding between ECDoH and Operation Smile for cleft palate repair has been signed). 24 cases have been operated in 2023/24.
- Accessibility of radiology images has been extended to all identified workstations .

Sub-Programmes 5.3: Specialised Tertiary Hospital

- Specialised Tertiary Hospitals
- Fort England (Specialised Psychiatric Hospital)

Sub-Programme Purpose

To strengthen and continuously develop the modern tertiary services platform to adequate levels in order to be responsive to the demands of the specialist service needs of the community of the Eastern Cape Province. There is one specialised tertiary hospital in the Eastern Cape Province:

Table 38: Outcomes, Outputs and Output indicators and targets for the next MTEF for Specialised Tertiary Hospital

		Denominator				64	80	20	20	20	20	80	80	

Explanation of planned performance over the medium-term period

Fort England hospital has newly appointed chief executive officer since October 2023. The Department will continue strengthening the clinical governance platform and fill critical vacant positions within the fiscal consolidation measures to enhance financial prudence. Community participation will be strengthened through hospital board effectiveness.

5.6 PROGRAMME RESOURCE CONSIDERATION

Table 39: Summary of payments and estimates by sub-programme: Programme 5: Central Hospital Services

Tables 39 and 40 above show the summary of payments and estimates for Central Hospital Services per sub-programme and economic classification. The programme's total expenditure increased from R4.845 billion in 2020/21 to a revised estimate of R5.044 billion in 2023/24. In 2024/25, the budget decreases by 0.2 per cent from R5.044 billion to R5.036 billion when compared to the 2023/24 revised estimate due to fiscal consolidation reduction to CoE.

Compensation of employees shows a negative growth of 8.2 per cent from R3.675 billion to R3.374 billion when compared to the 2023/24 revised estimate fiscal consolidation reduction to CoE.

Goods and services show a growth 17.5 per cent from R1.173 billion to R1.378 billion when compared to the 2023/24 revised estimate due to additional funding allocated for medicine to cater for dollar/exchange rate and cost pressures on medical supplies and diesel for non-exempted facilities during load shedding.

Transfers and subsidies shows a positive growth of 36.1 per cent from R50.272 million to R68.418 million when compared to the 2023/24 revised estimate due to additional funding resulting to payment of Medico Legal Claims.

Payments for capital assets show a positive growth of 51.6 per cent from R141.859 million to R215.029 million when compared to the 2023/24 revised estimate due reprioritisation to fund procurement of medical equipment in Provincial Tertiary Hospitals.

5.7 Key Risks

The table below outlines the key risks.

Table 41: Key Risks and mitigating factors

Outcome	Risk	Mitigating factors
- Quality of health services improved. - Maternal, Neonatal, Infant and Child Mortality reduced - Morbidity and Premature mortality due to Non-Communicable diseases reduced.	Non-adherence to policies and guidelines on referrals and services between Primary, Secondary and Tertiary Services.	- Implementation of the referral policy / protocol - Strengthen the clinical services platform - Ensure timeous filling of critical and replacement posts. - Enforcement of Policies and SOPs. - Implementation of the meeting resolutions. - Strengthen the quality of reports. - Procurement of appropriate healthcare technology as per APP.

PROGRAMME 6

HEALTH SCIENCES
AND TRAINING (HST)

Province of the
EASTERN CAPE
HEALTH

PROGRAMME 6: HEALTH SCIENCES AND TRAINING (HST)

6.1 Programme Purpose

To develop a capable health workforce for the Eastern Cape provincial health system as part of a quality people value stream.

HRD Chief Directorate is comprised of the following services

- Lilitha Training Colleges
- Eastern Cape College of Emergency Care (ECCOEC)
- Bursaries
- Other Training :
Health Professionals Training & Specialist Development, Generic Training and Development services and Health Professionals Education and Training

Strategies to reach the targets over the three-year period

- Research the current priority competencies that are available within the Department.
- Identify the competencies per selected occupational categories that are critical for effective service delivery at primary, secondary and tertiary levels of care.
- Profile the current competencies within the department against the required competencies identified and to identify critical education, training and development strategies.
- Education, training and development needs of health and support professionals in the Department are indicated through the continued engagement with all the appropriate Higher Education Institutions (HEIs) in South Africa.

Table 42: Outcomes, Outputs and Output indicators and targets for the next MTEF for Health Science and Training (HST)

Outcome (as per SP 2020/21- 2024/25)		Outputs	Output Indicator	Audited/Actual performance			Estimated Performance	MTEF Targets						
				2020/21	2021/22	2022/23	2023/24	2024/25	2024/25 Quarterly Targets				2025/26	2026/27
									Q1	Q2	Q3	Q4		
6. Quality of health services improved		Completed training and qualification obtained	6.7.1 Number of students completed the 4 - year comprehensive course	New Indicator	New Indicator	386	380	96	-	-	-	96	25	-
			6.7.2 Number of EMS Practitioners completed Emergency Care Qualification	9	6	8	6	9	-	-	-	9	9	9

		Youth programme conducted	6.7.5 Number of youth placed on youth programs	1548	1028	1087	1250	1350	-	-	-	1350	1450	1460

Explanation of planned performance over the medium-term period

The Skills Development Programme is planning to implement a range of capacity development programmes for existing workforce such as NQF aligned/and or Continuous Professional Development (CPD) points aligned skills development programmes, and bursaries for existing workforce in order to obtain qualifications and specialist clinical skills, and also youth development programmes to create a pool of qualified individuals from which the department can recruit by implementing learnerships, internships, traineeships' programmes and bursaries for unemployed youth.

The Performance Management Development System (PMDS) programme is intended to have all officials and employees of the department contracted by the 31st May each year, to be able to and attain 100% compliance. Those who have qualified for a Performance Incentive are employees on levels 1- 12 and SMS Members who have gone through the PMDS moderation and have been found to have performed within required standards and therefore awarded performance incentives as a token of appreciation for their contribution to improved service delivery and organisational performance.

The Eastern Cape College of Emergency Care (ECCOEC) will not have its own accreditation for the diploma program in Emergency Medical Care during the 2023 academic year. The existing plan is to allow staff to study on full time bursaries at accredited institutions towards the Diploma in Emergency Care. For the Higher Certificate in Emergency Care (H Cert: EMC), the ECCOEC is planning to present the program in conjunction with Nelson Mandela University, as soon as accreditation is received. The Council for Higher Education (CHE) has conditionally accredited the Higher Certificate: EMC. An intake for this program seems plausible provided that external processes such as SAQA registration and HPCSA accreditation is concluded on time. The ECCOEC is working closely with Nelson Mandela University to make this a reality.

The Department of Higher Education and Training has introduced changes or transformation processes on education and training by all colleges including Nursing Education Institutions (NEI) within the country. Lilitha College of Nursing is amongst these NEIs, this includes development of new programmes bended at higher education level and accreditation process of the new programs viz: - 3-year Diploma in Nursing, 1- Year Higher Certificate in Nursing, and a number of Post Graduate Diplomas in nursing (NQF 8). Presently the 3-Year Diploma received full accreditation from all accreditation bodies and commenced in March 2023.

The Higher certificate has received provisional accreditation from SANC and is with CHE for accreditation and submission to SAQA for final registration. Advanced Diploma in Midwifery (NQF 7) has been submitted to SANC for accreditation. The Post Graduate Diplomas of different speciality areas (which are still to be developed) will also be provided once the course regulatory process has been completed successfully.

The Bursary Programme is monitoring students on the database, the projections indicated on the table are for students who will be completing their final year of study during the next financial year and for the two outer years within the MTEF. The student bursars who are enrolled for Medical and Pharmacy Bachelor's programmes will, after completing university study years, be appointed by the department as interns, where in medical students will be appointed for a period of two years, whilst pharmacy students will only be appointed for one year. All other students in the Allied Health and Nursing Professions will be appointed in a community service programme for one year, straight after passing their final year, whilst the medical and pharmacy bursary students will be appointed into Community Services after they have completed their Internship programme.

The Registrar Programme is conducted in 3 Tertiary Institutions (Frere, Nelson Mandela Academic, Livingstone) 3 Regional Institutions (Dora Nginza, Cecilia Makiwane, Mthatha Regional) and 2 Psychiatric facilities (Fort England, and Elizabeth Donkin hospitals) through the Eastern Cape Department of Health. The programme is being funded under the Statutory Human Resource and Development Grant, Equitable Share and National Tertiary Services Grant in the various facilities.

6.2 PROGRAMME RESOURCE CONSIDERATION

Table 43: Summary of payments and estimates by sub-programme: Programme 6: Health Sciences and Training

R thousand	Outcome			Main appropriation	Adjusted appropriation 2023/24	Revised estimate	Medium-term estimates			% change from 2023/24

Tables 43 and 44 above show the summary of payments and estimates for Health Sciences and Training per sub-programme and economic classification. The programme's total expenditure increased from R720.097 million in 2020/21 to a revised estimate of R921.291 million in 2023/24. In 2024/25, the budget increases by 26.5 per cent from R921.291 million to R1.165 billion when compared to the 2023/24 revised estimate due to wage agreement addition for the compensation of employees.

Compensation of employees shows a positive growth of 48.3 per cent from R627.596 million to R930.502 million when compared to the 2023/24 revised estimate due to wage agreement addition and reprioritisation of funds for appointment of Medical Interns.

Goods and services show a negative growth of 24.5 per cent from R198.017 million to R149.523 million when compared to the 2023/24 revised estimate due to reprioritisation for the reimbursement of Walter Sisulu University Joint Staff Establishment and Health Resource Centres.

Transfers and subsidies show a positive growth of 0.4 per cent from R66.573 million to R66.840 million when compared to the 2023/24 revised estimate due to reprioritisation of funds to fund cost pressures on leave gratuities.

Payments for capital assets show a negative growth of 37.3 per cent from R29.105 million to R18.246 million when compared to the 2023/24 revised estimate due to higher revised estimate.

6.3 Key Risks

The table below outlines the key risks.

Table 45: Key Risks and mitigating factors

Outcome	Risk	Mitigating factors
Quality of health services improved	- Inadequate number of registrars trained. - Inadequate number of nurses trained on Post Basic Courses. - Delayed accreditation of new programmes	- Ensure timeous filling of critical and replacement posts. - Enforcement of policies and SOPs. - Implementation of the meeting resolutions. - Intercession by the Executive Management of the department of delayed accreditation process. - Strengthen the quality of reports. - Create, implement and maintain a clear training plan for registrars and nurses. - Have an SLA and good working relationship with institutions of higher learning.

PROGRAMME 7

HEALTH CARE SUPPORT SERVICES (HCSS)

Province of the
EASTERN CAPE
HEALTH

PROGRAMME 7: HEALTH CARE SUPPORT SERVICES (HCSS)

7.1 Programme Purpose

To render quality, effective and efficient transversal health (orthotic & prosthetic, rehabilitation, laboratory, social work services and radiological services) and pharmaceutical services to the communities of the Eastern Cape. Health Care Support Services consist of two sub-programmes: Transversal Health Services and Pharmaceutical Services.

Transversal Health Services consists of:

- The orthotic & prosthetic (O&P) services sub-programme, which has three existing O&P centres. The centres are based within the three hospitals namely the PE Provincial hospital, in East London at Frere hospital, and in Mthatha at Bedford Orthopaedic hospital. The prescriptions received from medical professionals and the referrals especially from the outreach programme determine the need for the service.
- Rehabilitation, laboratory, social work and radiological services are rendered at all hospitals and/or community health centres.
- Rehabilitation services is provided in 61 hospitals and 13 primary health care services throughout the province. The service have been rolled out to three PHC facilities (Flagstaff CHC, Lisikisiki village clinic and Baziya clinic) in OR Tambo to support NHI project with Flagstaff CHC having full complement of rehabilitation services.

Pharmaceutical Services is responsible for

- Coordination of the full spectrum of the Pharmaceutical Management Framework including medicine selection, supply, distribution, and utilization.
- Pharmaceutical standards development and monitoring for health facilities and the two medical depots are coordinated under this programme.
- Promote rational use of essential medicines and medical products.

Strategies to reach the targets over the three-year period

- Resource mobilization to strengthen the management of the Cerebral Palsy (CP) cases as part of the medico legal mitigation strategy.
- Fully establish centres of excellence for the management of Cerebral Palsy (are you fully establishing or continuously establish or maintaining the existing ones).
- Develop the capacity of the rehabilitation health professionals on such skills as wheelchair seating, Cerebral Palsy management, early childhood screening to establish normal or abnormal child development.
- Strengthen rehabilitation services at district hospitals, primary health care facilities and at community level.
- Strengthen partnerships with private, not-for-profit organizations and promote interdepartmental collaboration to support the achievement of rehabilitation programme outcomes.
- Establishment of wheelchair repair centres to improve cost effectiveness and efficiency in the provision of wheelchairs.
- Outreach services for the Medical Orthotist and Prosthetics (MOP) to improve access to prostheses and orthoses for people with disabilities to maintain their dignity.
- Introduce efficiencies in the blood and blood products and laboratory service utilization.
- Strengthen the functioning of the provincial pharmaceutical and therapeutics committee to promote rational use of medicine and pharmaceutical products.
- Expand the Central Chronic Medication, Dispensing and Distribution (CCMDD) programme to reach more clients in more wards around the province.
- Promoting compliance to relevant legislation e.g. South African Pharmacy Council, Office of Health Standards Compliance,
- Strengthen and promote efficiency in the medicines supply chain management.

Table 46: Outcomes, Outputs and Output indicators and targets for the next MTEF for Health Care Support Services (HCSS)

Outcome (as per SP 2020/21-2024/25)	Outputs	Output Indicator	Audited/Actual performance			Estimated Performance	MTEF Targets

Explanation of planned performance over the medium-term period

The health care support programme is critical in the delivery and provision of quality health services in the province. The programme focuses on ensuring an uninterrupted availability of medicines, laboratory services and blood products. It is also responsible for the provision of rehabilitation services which is also a mitigating factor in public health care defense, as well as radiology accessible to all patients.

The programme endeavours to contribute to improved quality health care through the provision of effective rehabilitative services and the rational use of essential medicines.

The availability of assistive devices, adequately skilled personnel and access to rehabilitation services are essential inputs to the quality of care provided to persons with disabilities. The Eastern Cape province has seen an increase in demand for assistive devices due to high cases of trauma and injury, and the prevalence of chronic diseases such as diabetes. The programme provides/issues assistive devices, to people who have been clinically assessed by qualified rehabilitation professionals, orthotic and prosthetic and orthopaedic and ear, nose, throat (ENT) specialists in the hospitals. Physiotherapy, occupational therapy, speech therapy, audiology services and orthotic and prosthetic services are provided to eligible clients by the multi-disciplinary team of registered professionals at various levels of care.

The provision of comprehensive care for children with Cerebral Palsy (CP) remains a priority intervention of the department as part of the medico-legal mitigation strategy. The programme continues to build capacity at various institutions to provide care and treatment to children with Cerebral Palsy. The province is currently providing services to about 2 812 children with CP at 43 health facilities. The department of health continues to establish partnership with various organisation to expand services to children with CP. Over the medium term, the programme will invest resources to ensure that appropriate equipment, skilled staff and suitable infrastructure are available for the management of Cerebral Palsy. A multi-disciplinary team of clinicians and rehabilitation professionals will be available at selected facilities to provide a higher level of care to patients.

The program continues to build leadership to improve accountability and quality of service through the inclusion and appointment of Deputy Directors: Therapeutic and Medical Support services and Assistantant Directors (ADs) as case managers in the current year Annual Recruitment Plan (ARP).

Laboratory services and blood products are amongst the major cost drivers in the department. The programme will work with clinicians, and the blood and laboratory service providers (National Health Laboratory Services (NHLS) and South African National Blood Services (SANBS) to introduce efficiencies which include the improved implementation of the electronic gate keeping (e-Gatekeeping) system, enforcement of the essential laboratory list, and establishment of the Blood and Laboratory Users committees at all regional and tertiary hospitals. With the frequent power outages around the province, the programme will work with SANBS to secure the blood products storage and protect them from the

impact of the power outages. Wastage of blood supply and laboratory services will be reduced significantly through interventions which include capacity building of clinicians and other measures which will be developed by each institutional clinical governance forum. Inventory management of laboratory commodities will also be prioritized as the wastage and misuse of laboratory commodities has been identified as an area of financial inefficiency.

The uninterrupted availability and rational use of medicines remains a key input of the programme towards achieving quality health care targets in programmes 2, 4 and 5. The achievement of health outcomes rests on the department's ability to efficiently procure, warehouse, distribute and dispense quality assured medicines for the management of common health conditions. The current fiscal space forces the department to consider various efficiency measures in the procurement and supply chain management of essential medicines to the clinics and hospitals around the province. The programme will work to realign the medicines procurement and ensure there is value for money and compliance with public procurement regulations in the medicines procurement and distribution. Stock management at health facilities, especially in clinics will be strengthened.

Availability of skilled pharmacy personnel remains an important input in our efforts to achieve the goal of uninterrupted availability of essential medicines. Human resources such as the community service pharmacists placed at district hospitals and increased number of pharmacist assistants for clinics are the main personnel related interventions over the medium term. The programme will work with programme 6 to develop the skills of all pharmacy personnel in stock management and promoting rational use of medicines.

The rollout of RxSolution application for inventory management will be fast tracked at hospitals, linking it to the broadband rollout of the province. The stock visibility system (SVS) will be used to track stock levels at clinics and make decision on resupply and redistribution. Staffing at the depots will also be improved with focus on lower level cadres in the category of warehouse assistants and pharmacist assistants. The availability of the appropriate number of personnel at the depot is important to ensure that orders are processed and released to facilities to prevent stock outs.

7.2 PROGRAMME RESOURCE CONSIDERATION

Table 47: Summary of payments and estimates by sub-programme: Programme 7: Health Care Support Services

Total economic classification	152 387	112 986	115 053	175 171	199 900	131 833	248 787	248 420	250 787	88.7

Tables 47 and 48 above show a summary of payments and estimates for Health Care Support Services per sub-programme and economic classification. The programme's total expenditure decreased from R152.387 million in 2020/21 to a revised estimate of R131.833 million in 2023/24. In 2024/25, the budget increased by 88.7 per cent from R131.833 million to R248.787 million when compared to the 2023/24 revised estimate due to additional funding for wage agreement and funds reprioritised from other programmes to fund the new sub-programme "medico legal compensatory services".

Compensation of employees shows a growth of 11.8 per cent from R71.444 million to R79.845 million when compared to the 2023/24 revised estimate due to additional funding for wage agreement.

Goods and services show a growth 229.4 per cent from R44 million to R145.093 million when compared to the 2023/4 revised estimate due to funds reprioritised from other programmes to fund the new sub-programme "medico legal compensatory services".

Transfers and subsidies show a negative growth of 100 per cent from R465 thousand to R0 when compared to the 2023/24 revised estimate due to no provision made on leave gratuities.

Payments for capital assets show a positive growth of 50.2 per cent from R15.881 million to R23.849 million when compared to the 2023/24 revised estimate due reprioritisation for procurement of medical equipment.

7.3 Key Risks

The table below outlines the key risks.

Table 49: Key Risks and mitigating factors

Outcome	Risk	Mitigating factors
Quality of health services improved.	- Interrupted inventory supply and availability (medicine and medical supplies) - Inadequate Inventory Management. - Inadequate number of wheelchairs issued.	- Implement capacity building and staff development. - Recruitment of pharmaceutical posts at depots and institutions. - Roll out Remote Demander Module for electronic medicines and consumables ordering. - Continual Medicine Supply Chain training. - Monitor Contract Management of Medicine suppliers. - Establish a provincial contract for certain essential medicines and supplies that are not on national contract. - Expansion of Direct Delivery to hospitals. - Continue employment of pharmacy assistants. - Continue roll out of RXSolution to all hospitals and support full functionality. - Enforcement of policies and SOPs. - Implementation of the meeting resolutions. - Strengthen the quality of reports. - Ensure adequate procurement of wheel chairs as per APP.

PROGRAMME 8

HEALTH FACILITIES MANAGEMENT (HFM)

Province of the
EASTERN CAPE
HEALTH

PROGRAMME 8: HEALTH FACILITIES MANAGEMENT (HFM)

8.1 Programme Purpose

To improve access to health care services through provision of new health facilities, upgrading and revitalisation, as well as maintenance of existing facilities, including the provision of appropriate health care equipment.

The programme comprises of four (4) directorates to ensure that it delivers to its mandate effectively and efficiently. These directorates are:

- Infrastructure Planning
- Infrastructure Programme Delivery
- Health Technology
- Engineering & Technical Support Services

The programme has 5 sub-programmes, which it supports namely:

- Community Health Facilities
- Emergency Medical Services
- District Hospital Services
- Provincial Hospital services
- Other facilities

Table 50: Outcomes, Outputs and Output indicators and targets for the next MTEF for Health Facilities Management (HFM)

Outcome (as per SP 2020/21- 2024/25)	Outputs	Output Indicator	Audited/Actual performance			Estimated Performance	MTEF Targets						
			2020/21	2021/22	2022/23	2023/24	2024/25	2024/25 Quarterly Targets				2025/26	2026/27

Explanation of planned performance over the medium-term period

Health Facilities Management (Programme 8) has the responsibility of improving access to health care services through the provision of new health care facilities, upgrading and revitalisation and maintenance of existing facilities. In the Programme's effort to deliver on these expectations, the programme has planned to initiate 50 projects over the MTEF and 45 projects in 2024/25 will be initiated across the province. Amongst the planned projects, there is construction of a new clinic in Mpozolo, repairs, renovations, and refurbishments of but not limited to Thanga clinic, Taylor Bequest hospital in Matatiele and Madzikane ka Zulu in Mt Frere.

In pursuit of ensuring that health facilities are in a habitable state, a total of **20** capital infrastructure projects are planned to be completed in 2024/25 financial year. The planned capital infrastructure projects include completion of SS Gida hospital - renovations & refurbishments in Amathole, Maclear hospital repairs and renovations, Taylor Bequest hospital: new 30 bed isolation facility and Steynsburg hospital: completion contract refurbishment and maintenance in Joe Gqabi. In addition, a project on security upgrades is planned to be completed in 2024/25 in Nelson Mandela Bay, Sarah Baartman, Joe Gqabi and Buffalo City Metro, furthermore there are Alternative Building Technology (ABT) projects that have been planned to be completed in the OR Tambo district.

In ensuring that the facilities are functioning optimally in providing – improved health care services, the programme implements scheduled/preventative maintenance programmes for short-term and medium-term scheduled servicing. The objective of such programmes will also be to prevent unnecessary breakdowns and asset failures, as well as to prevent high maintenance costs related to deferred maintenance. Records of maintenance schedules must be kept, indicating the scope, scheduling, and actual execution of all preventative maintenance programmes. Scheduled/preventative maintenance is normally carried out by dedicated maintenance teams. Dedicated maintenance teams will consist of trained or specialized labour e.g. artisans. In 2024/25, the programme has planned to conclude 30 maintenance contracts which will be implemented to maintain major equipment that is utilised for optimal functioning of health facilities in the province.

8.2 PROGRAMME RESOURCE CONSIDERATION

Table 51: Summary of payments and estimates by sub-programme: Programme 8: Health Facilities Management

Tables 51 and 52 above show the summary of payments and estimates for Health Facilities Management per sub-programme and economic classification. The programme's total expenditure decreased from R1.357 billion in 2020/21 to a revised estimate of R1.165 billion in 2023/24. In 2024/25, the budget increases by 12.1 per cent from R1.165 billion to R1.306 billion when compared to the 2023/24 revised estimate due to additional funding for the Health Facility Revitalisation Grant.

Compensation of employees shows a positive growth of 45.3 per cent from R32.510 million to R47.237 million when compared to the 2023/24 revised estimate resulting from delays in filing of posts and wage agreement addition.

Goods and services show a positive growth of 12.5 per cent from R337.117 million to R379.135 million when compared to the 2023/24 revised, attributable estimate, attributable to delays in payment of contractors within delayed projects as well as additional funding allocated in the Health Facility Revitalisation Grant.

Payments for capital assets show a positive growth of 10.6 per cent from R795.452 million to R880.156 billion when compared to the 2023/24 revised estimate due to the additional funding on Health Revitalisation Facilities Grant.

8.3 Key Risks

The table below outlines the key risks.

Table 53: Key Risks and mitigating factors

Outcome	Risk	Mitigating factors
Quality of health services improved.	Unsuitable infrastructure.	- Improve human resource capacitation within the unit in the build environment profession. - Strengthen and monitor compliance to the terms of the SLA. - Enforce compliance with the policies and SOPs. - Implementation of the resolutions of the meetings. - Strengthen the quality of reports.
	Inadequate Management of Infrastructure Projects and Maintenance	- Continuously follow-up with Public Works on their state of readiness to implement the maintenance program. - Gradually handover some of the maintenance functions to DPW. - Implementation of meetings action list

N:B Population based indicators are not divided by 4 when it comes to quarterly targets

Table 55: Technical Indicator Data Set

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number	
				Numerator	Denominator										
Output Indicator															
PROGRAMME I: HEALTH ADMINISTRATION															
x	9.1.2 Number of statutory documents tabled at Legislature	Statutory documents submitted and tabled at the Provincial Legislature	Departmental website Head Office	Statutory documents submitted	Not applicable	Head Office - Copies of the documents Submission letters	Accuracy dependent of submission of valid information	Not applicable	Not applicable	Cumulative year - end	Quarterly	Higher	Office of the MEC	I	
x	7.1.1 Audit opinion of Provincial DoH	Improvement of Audit opinion for Provincial Department of Health for financial performance	Auditor General South Africa (AGSA) final report	Audit outcome expressed by AGSA 2023/24 financial year	Not applicable	AGSA Management letter	Accuracy dependent of submission of valid documents	Not applicable	All Districts	Non - cumulative	Annual	Unqualified Audit Opinion	Chief Financial Officer	I	

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
x	7.1.2 Approved Annual Procurement Plan	List of projects according to capital budget	SCM	Procurement plan submitted	Not applicable	SCM office: Final approved procurement plan	Accuracy dependent of submission of valid documents	Not applicable	Not applicable	Cumulative year end	Quarterly	Annual procurement plan approved	Manager: Supply Chain Management	I
x	7.1.3 Amount Revenue generated (R)	Amount of revenue to be collected by districts	Financial management system	Amount of revenue collected	Not applicable	Financial management system	Client affordability	Not applicable	All districts	Cumulative year end	Quarterly	Higher	Manager: Financial Management	I
	6.4.1 Holistic Human Resources for Health (HRH) strategy approved	Approved HRH strategy for Health	HRH strategy	HRH strategy approved	Not applicable	HRH strategy	Strategy developed and approved	Not applicable	Not applicable	Non cumulative	Annual	Higher	HRM manager	I
x	8.1.1 Contingent liability of medico – legal cases	Total rand value of the medico legal claims for all backlog cases that were on the case register as at	Medico-legal case management system	Total rand value of the medico legal claims for all backlog cases that were on the case register as at	Not Applicable	Medico-legal case management system	Accuracy dependent of reporting of data into the system	Not Applicable	All Districts	Non-cumulative	Annual	Lower	Legal Services	I

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
		31 March 2024		31 March 2024										
x	6.7.1 Percentage of hospitals with connectivity	Provision of Hospitals with alternative connectivity or broad band	Rollout report (spreadsheets) for sites that are live or with alternative connectivity	Total Number of hospitals with minimum 2 Mbps connectivity	Total Number of Hospitals	Reports (spreadsheets) for sites that are live or with alternative connectivity of data connectivity in hospitals	Depending on Provincial broadband Provision of departmental alternative connectivity	Not applicable	All districts	Non-cumulative	Annual	Higher	ICT Directorate / Chief Directorate	I
x	6.7.2 Percentage of fixed PHC facilities with connectivity	Provide all fixed PHC facilities with alternative connectivity or broad band	Rollout report (spreadsheets) for sites that are live or with alternative connectivity	Total Number of fixed PHC facilities with minimum 1Mbps connectivity	Total Number of fixed PHC Facilities	Reports (spreadsheets) for sites that are live or with alternative connectivity of data in fixed PHC facilities	Depending on Provincial broadband Provision of departmental alternative connectivity	Not applicable	All districts	Non-cumulative	Annual	Higher	ICT Directorate / Chief Directorate	I
PROGRAMME 2: DISTRICT HEALTH SERVICES														

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number	
				Numerator	Denominator										
SUB PROGRAMME 2.1: DISTRICT MANAGEMENT															
x	9.1.1 Number of Districts conducted quarterly performance reviews	Districts conducting performance reviews per quarter	District reports	Number of Districts conducted quarterly performance reviews	Not applicable	Reports Attendance register	Accuracy dependent of submission of valid data for the performance reviews	Not applicable	All Districts	Non-cumulative	Quarterly	Higher	DHS Manager	2	
SUB PROGRAMME 2.2: COMMUNITY HEALTH CLINICS															
x	6.2.1 Ideal Clinic status obtained rate	Fixed PHC health facilities that obtained Ideal Clinic status (silver, gold, platinum) as a proportion of fixed PHC clinics and CHCs and or CDCs	Ideal clinic monitoring tools	Fixed PHC health facilities have obtained Ideal Clinic status, as determined by PPTICRM (PRs) or Peer Reviews Updates (PRUs)	Fixed PHC clinics or fixed CHCs and or CDCs Formula: Total number of clinics + Total number of CHCs and or CDCs	Ideal Health Facility software, ICS report	Accuracy dependent on quality of data submitted by health facilities	Not applicable	All Districts	Non-cumulative	Annual	Higher	Quality Assurance Manager	2	

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
x	6.1.1 Patient experience of care satisfaction rate	Total number of satisfied responses as a proportion of all responses from Patient Experience of Care survey questionnaires	National PEC Surveys Module WebDHIS	Patient Experience of Care survey satisfied responses	Patient Experience of Care survey total responses	PEC Survey report	Accuracy dependent on quality of data submitted by health facilities	Not Applicable	All Districts	Non-cumulative	Annual	Higher	Quality Assurance Manager	2
	6.3.8 Severity assessment code I incident reported within 24 hours rate	Severity assessment code I incidents reported within 24 hours as a proportion of Severity assessment code I incident reported	Patient Safety Incident register	Severity assessment code I incidents reported within 24 hours	Severity assessment code I incident reported	Patient Safety Incident report	Accuracy dependent on quality of data submitted by health facilities	Not Applicable	All Districts	Non-cumulative	Quarterly	Higher	Quality Assurance	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
	6.3.17 Patient Safety Incident (PSI) case closure rate	Patient Safety Incident (PSI) case closed in the reporting month as a proportion of Patient Safety Incident (PSI) cases reported in the reporting month	Patient safety incident register	Patient Safety Incident (PSI) case closed	Patient Safety Incident (PSI) case reported	Patient Safety Incident report	Accuracy dependent on quality of data submitted by health facilities	Not applicable	All Districts	Non - cumulative	Quarterly	Higher	Quality Assurance	2
SUB PROGRAMME 2.3: COMMUNITY HEALTH CENTERS (CHC)														
x	6.1.2 Patient experience of care satisfaction rate	Total number of satisfied responses as a proportion of all responses from Patient Experience of Care survey questionnaires	National PEC Surveys Module WebDHIS	Patient Experience of Care survey satisfied responses	Patient Experience of Care survey total responses	PEC Survey report	Accuracy dependent on quality of data submitted by health facilities	Not Applicable	All Districts	Non-cumulative	Annual	Higher	Quality Assurance Manager	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
	6.3.9 Severity assessment code (SAC) I incident reported within 24 hours rate	Severity assessment code I incidents reported within 24 hours as a proportion of Severity assessment code I incident reported	Patient Safety Incident register	Severity assessment code I incidents reported within 24 hours	Severity assessment code I incident reported	Patient Safety Incident report	Accuracy dependent on quality of data submitted by health facilities	Not Applicable	All Districts	Non - cumulative	Quarterly	Higher	Quality Assurance	2
	6.3.18 Patient Safety Incident (PSI) case closure rate	Patient Safety Incident (PSI) case closed in the reporting month as a proportion of Patient Safety Incident (PSI) cases reported in the reporting month	Patient safety incident register	Patient Safety Incident (PSI) case closed	Patient Safety Incident (PSI) case reported	Patient Safety Incident report	Accuracy dependent on quality of data submitted by health facilities	Not applicable	All Districts	Non - cumulative	Quarterly	Higher	Quality Assurance	2
SUB PROGRAMME 2.4: COMMUNITY BASED SERVICES: DISEASE PREVENTION AND CONTROL (DPC)														

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
	4.2.1 Positivity rate for hypertension 18 - 44 years	Number of clients 18 - 44 years screened for hypertension and who will require being put on treatment for hypertension	PHC Comprehensive Tick Register; OPD Tick Register	Number of clients 18 - 44 years screened for hypertension and requiring/referred for treatment for hypertension	Total number of clients 18 - 44 years screened for hypertension	DHIS report PHC Comprehensive Tick Register; OPD Tick Register and Accident and Emergency (Casualty) and Trauma unit Register	Accuracy dependent of submission of valid documents	Not Applicable	All Districts	Non - cumulative	Quarterly	Higher	Health programmes	2
	4.2.2 Positivity rate for hypertension ≥ 45 years	Number of clients > 45 years screened for hypertension and who will require being put on treatment for hypertension	PHC Comprehensive Tick Register; OPD Tick Register	Number of clients ≥ 45 years screened for hypertension and requiring/referred for treatment for hypertension	Total number of clients ≥ 45 years screened for hypertension	PHC Comprehensive Tick Register; OPD Tick Register and Accident and Emergency (Casualty)a	Accuracy dependent of submission of valid documents	Not Applicable	All Districts	Non - cumulative	Quarterly	Higher	Health programmes	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
						and Trauma unit Register								
	4.3.1 Positivity rate for diabetes 18 - 44 years	Number of clients 18 - 44 years screened for diabetes and who will require being put on treatment for diabetes	PHC Comprehensive Tick Register; OPD Tick Register	Number of clients 18 - 44 years screened for diabetes and requiring/referred for treatment for diabetes.	Total number of clients 18 - 44 years screened for diabetes.	PHC Comprehensive Tick Register; OPD Tick Register and Accident and Emergency (Casualty) and Trauma unit Register	Accuracy dependent of submission of valid documents	Not Applicable	All Districts	Non - cumulative	Quarterly	Higher	Health programmes	2
	4.3.2 Positivity rate for diabetes ≥ 45 years	Number of clients > 45 years screened for diabetes and who will require being put on	PHC Comprehensive Tick Register; OPD Tick Register	Number of clients ≥ 45 years screened for diabetes and requiring/referred for treatment for diabetes	Total number of clients ≥ 45 years screened for diabetes	PHC Comprehensive Tick Register; OPD Tick Register and Accident and Emergency	Accuracy dependent of submission of valid documents	Not Applicable	All Districts	Non - cumulative	Quarterly	Higher	Health programmes	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number

		the time of death												
SUB – PROGRAMME 2.7: MCWH&N														
x	1.1.1 IUCD Uptake (*IUCD - Intra Uterine Contraceptive Device)	The Intra Uterine Contraceptive Device (IUCD) inserted into a women aged 15-49	PHC Comprehensive Tick Register Delivery Register, OPD Register	Number IUCD Inserted	Not applicable	PHC Comprehensive Tick Register Delivery Register, OPD Register	Accuracy dependent on quality of data submitted health facilities	Females	All Districts	Cumulative (year-to-date)	Quarterly	Higher	MCYWH&N Programme	2
x	1.1.2 Antenatal 1 st visit before 20 weeks rate	Women who have a first visit before they are 20 weeks into their pregnancy as proportion of all antenatal 1 st visits	PHC Comprehensive Tick Register Tick register OPD	Antenatal 1 st visit before 20 weeks	Antenatal 1 st visit- total Formula: Antenatal 1 st visit 20 weeks or later + Antenatal 1 st visit before 20 weeks	PHC Comprehensive Tick Register Tick register OPD	Accuracy dependent on quality of data submitted by health facilities	Females	All Districts	Cumulative year-end	Quarterly	Higher	MCW&H Programme Manager	2
x	1.1.3 Antenatal	Antenatal clients who	PHC Comprehensive	Antenatal start on ART	Antenatal known HIV positive but	ART clinical	Accuracy dependent	Females	All Districts	Non - cumulative	Quarterly	Higher	MCW&H	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
	client start on ART rate	started on ART as a proportion of the total number of antenatal clients who are HIV positive and not previously on ART	nsive Tick Register Tick register OPD		NOT on ART at 1st visit Formula: Antenatal known HIV positive but NOT on ART at 1st visit + Antenatal HIV 1st test positive + Antenatal HIV re-test positive	record captured in Tier.net	on quality of data submitted by health facilities						Programme Manager	
x	1.1.4 Delivery in 10 - 14 years in facility	Delivery where the mother is 10-14 years old. These deliveries are done in facilities under the supervision of trained medical/nursing staff	Midnight census, Inpatient sick neonatal admission register (ISNAR) Birth register, Peads register	Number Delivery 10-14 years in facility	Not applicable	Health Facility Register	Accuracy dependent on quality of data submitted by health facilities	Females	All Districts	Cumulative year-end	Quarterly	Lower	MCW&H Programme Manager	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
x	1.1.5 Maternal Mortality in facility ratio - Per 100 000 live births	Maternal death is death occurring during pregnancy, childbirth and the puerperium of a woman while pregnant or within 42 days of termination of pregnancy, irrespective of the duration and site of pregnancy and irrespective of the cause of death (obstetric and non-obstetric) per 100,000 live births in facility	PHC Comprehensive Tick Register Ward; Tick register OPD delivery and ICU Register, Midnight census	Maternal death in facility	Live births known to facility Formula: Live births in facility + Born alive before arrival in facility	PHC Comprehensive Tick Register Ward; Tick register OPD delivery and ICU Register, Midnight census, Tick register casualty	Accuracy dependent on quality of data submitted by health facilities	Females	All Districts	Non- Cumulative	Quarterly	Lower rates	MCWH&N Programme	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
x	1.2.1 Live birth under 2500g in facility rate	Infants born alive weighing less than 2500g as proportion of total Infants born alive in health facilities (Low birth weight)	Delivery register	Live birth under 2500g in facility	Live birth in facility	Delivery register	Accuracy dependent on quality of data submitted by health facilities	Not Applicable	All Districts	Non cumulative	Quarterly	Lower rates	MCWH&N Programme	2
x	1.2.2 Mother postnatal visit within 6 days rate	Mothers who received postnatal care within 6 days after delivery as proportion of deliveries in health facilities	PHC Comprehensive Tick Register, Post-natal register, Maternity Register, OPD register	Mother postnatal visit within 6 days after delivery	Delivery in facility – total Formula: Delivery 10-14 years in facility + delivery 15-19 years in facility + delivery 20 years and older in facility	Midnight Census, Inpatient sick neonatal admission register (ISNAR), Birth Register, Paeds Register,	Accuracy dependent on quality of data submitted by health facilities	Females	All Districts	Cumulative (year-end)	Quarterly	Higher rates	MCWH&N Programme	2
x	1.3.2 Infant PCR test positive	Infant PCR test positivity around 6months among infants	PHC registers, paediatric	Infant PCR test positive around 6months	Infant HIV PCR test around 6 months	PHC registers, paediatric	Accuracy dependent on quality of data submitted	children	All Districts	Cumulative (year-to-date)	Quarterly	Lower rate	PMTCT Programme	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
	around 6 months rate	born to HIV positive mothers	registers, Tier.net			registers, Tier.net	by health facilities							
x	1.3.3 Immunisation under 1 year coverage	Children under 1 year who completed their primary course of immunisation as a proportion of population under 1 year	PHC Comprehensive Tick Register	Immunised fully under 1 year new	Population under 1 year Formula Female under 1 year + Male under 1 year	PHC Comprehensive Tick Register	Accuracy dependent on quality of data submitted by health facilities	children	All Districts	Cumulative (year-to-date)	Quarterly	Higher coverage	EPI Programme manager	2
x	1.3.4. Measles 2nd dose 1 year coverage	Children 1 year (12 months) who received measles 2nd dose, as a proportion of the 1 year population.	PHC Comprehensive Tick Register	Measles 2nd dose	Target population 1 year Formula Male 1 year + Female 1 year	PHC Comprehensive Tick Register	Accuracy dependent on quality of data submitted by health facilities	children	All Districts	Cumulative (year-to-date)	Quarterly	Higher coverage	EPI Programme manager	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
x	1.3.5 Death under 5 years against live birth rate	Children under 5 years who died during their stay in the facility as a proportion of all live births	Midnight Census, Inpatient sick neonatal admission register (ISNAR), Birth Register, Paeds Register	Death in facility under 5 years total Formula: Death in facility 0-6 days + Death in facility 7-28 days + Death in facility 29 days - 11 months + Death in facility 12-59 months	Live birth in facility	Midnight Census, Inpatient sick neonatal admission register (ISNAR), Birth Register, Paeds Register	Accuracy dependent on quality of data submitted by health facilities	Not applicable	All Districts	Non-Cumulative	Quarterly	Lower rate	MCW&H Programme Manager	2
x	1.3.6 Neonatal death in facility rate (Per 1000 live births)	Infants 0-28 days who died during their stay in the facility per 1000 live births in facility.	Midnight Census, Inpatient sick neonatal admission register (ISNAR), Birth Register,	Neonatal deaths (under 28 days) in facility Formula: Death in facility 0-6 days] + [Death in	Live birth in facility	Midnight Census, Inpatient sick neonatal admission register (ISNAR), Birth Register,	Accuracy dependent on quality of data submitted by health facilities	Not applicable	All Districts	Cumulative year-to-date	Quarterly	Lower rate	MCW&H Programme Manager	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
			Paeds Register	facility 7-28 days		Paeds Register								
	1.3.8 Still birth in facility rate (per 1000 births)	Infants born still as proportion of total infants born in health facilities	Delivery register	Still Birth in facility	Total births in facility Formula: Live birth in facility + still birth in facility	Delivery register, Midnight report	Accuracy dependent on quality of data submitted by health facilities	Children	All Districts	Non – cumulative	Quarterly	Lower rates	MCWH&N Programme	2
x	1.3.7 Vitamin A dose 12-59 months coverage	Children 12-59 months who received Vitamin A 200,000 units, every six months as a proportion of population 12-59 months.	PHC Comprehensive Tick Register OPD Tick register,	Vitamin A dose 12-59 months Formula Vitamin A dose 12-59 months + COS Vitamin A dose 12-59 months	Target population 12-59 months * 2 Formula (Female 1 year + Female 02-04 years + Male 1 year + Male 02-04 years) * 2	PHC Comprehensive Tick Register OPD Tick register, CHW Daily Activity Tracker	PHC register is not designed to collect longitudinal record of patients. The assumption is the that the calculation proportion of children would have	children	All Districts	Cumulative (year-to-date)	Quarterly	Higher coverage	MCWH&N Programme	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
							received two doses based on this calculation							
x	1.3.9 Child under 5 years diarrhoea case fatality rate	Diarrhoea deaths in children under 5 years as a proportion of diarrhoea separations under 5 years in health facilities	Paediatric Ward register	Diarrhoea death under 5 years	Diarrhoea separation under 5 years	Paediatric Ward register	Accuracy dependent on quality of data submitted by health facilities	children	All Districts	Non-Cumulative	Quarterly	Lower rate	MCWH&N Programme	2
x	1.3.10 Child under 5 years pneumonia case fatality rate	Pneumonia deaths in children under 5 years as a proportion of pneumonia separations under 5 years	Paediatric Ward register	Pneumonia death under 5 years	Pneumonia separation under 5 years	Paediatric Ward register	Accuracy dependent on quality of data submitted by health facilities	children	All Districts	Non-Cumulative	Quarterly	Lower rate	MCWH&N Programme	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
		in health facilities												
x	1.3.11 Child under 5 years severe acute malnutrition case fatality rate	Severe acute malnutrition deaths in children under 5 years as a proportion of severe acute malnutrition (SAM) under 5 years in health facilities	Paediatric Ward register	Severe acute malnutrition death under 5 years	Severe acute malnutrition inpatient separation under 5 years	Paediatric Ward register	Accuracy dependent on quality of data submitted by health facilities	Children	All Districts	Non-Cumulative	Quarterly	Lower rate	MCWH&N Programme	2
x	4.3.3 Cervical cancer screening coverage	Cervical smears in women 30 years and older as a proportion of the female population 30-50 years (80% of these women should be screened	PHC Comprehensive Tick Register; OPD tick register, Inpatient register	Cervical cancer screening done Formula: Cervical cancer screening in non HIV woman 30-50 years + Cervical	[(80% women aged 30-50yrs/10)+(20% women aged 20 years and above /3)	PHC Comprehensive Tick Register ;OPD tick register, Inpatient register	Accuracy dependent on quality of data submitted by health facilities	Not Applicable	All Districts	Cumulative (year - to-date)	Quarterly	Higher Rate of Servical Cancer Screening	MCWH&N Programme	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
		for cervical cancer every 10 years and 20% must be screened every 3 years) which should be included in the denominator because it is estimated that 20% of women 20 years and older are HIV positive		cancer screening in HIV positive woman 20 years and older										
SUB-PROGRAMME 2.8: CORONER SERVICES														
x	6.4.5 Percentage of post – mortem performed within 72 hours	Measures number of post-mortems performed by Forensic Pathologists within a period of 3 days of receiving the body from the SAPS as a	Post - mortem management system	Number of cold bodies with post-mortem performed within 72 hrs. of receipt of body	Total number of cold bodies received from SAPS	Post-mortem form Register	Accuracy dependent of turn around time for post moterm performed	Not applicable	All Districts	Cumulative year-to-date	Quarterly	Higher rate	Hospital services Programme Manager	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
		percentage of the total number of bodies received												
SUB – PROGRAMME 2.9: DISTRICT HOSPITALS														
x	6.1.3 Patient experience of care satisfaction rate	Total number of satisfied responses as a proportion of all responses from Patient Experience of Care survey questionnaires	National PEC Surveys Module WebDHIS	Patient Experience of Care survey satisfied responses	Patient Experience of Care survey total responses	PEC Survey report	Accuracy dependent on quality of data submitted by health facilities	Not Applicable	All Districts	Non-cumulative	Annual	Higher	Quality Assurance	2
x	6.3.1 Severity assessment code 1 incident reported within 24 hours rate	Severity assessment code 1 incidents reported within 24 hours as a proportion of Severity	Patient Safety Incident register	Severity assessment code 1 incidents reported within 24 hours	Severity assessment code 1 incident reported	Patient Safety Incident report	Accuracy dependent on quality of data submitted by health facilities	Not Applicable	All Districts	Non-cumulative	Quarterly	Higher	Quality Assurance	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
		assessment code 1 incident reported												
x	6.3.10 Patient Safety Incident case closure rate	Patient Safety Incident (PSI) case closed in the reporting month as a proportion of Patient Safety Incident (PSI) cases reported in the reporting month	Patient safety incident register	Patient Safety Incident (PSI) case closed	Patient Safety Incident (PSI) case reported	Patient Safety Incident report	Accuracy dependent on quality of data submitted by health facilities	Not applicable	All Districts	Non - cumulative	Quarterly	Higher	Quality Assurance	2
x	6.7.1 Average Length of Stay	The average number of client days an admitted client spends in hospital before separation. Inpatient separation is the total of	Midnight Census	Inpatient days + 1/2 Day patients Formula: Inpatient days total x 1 + Day patient total x 0.5	Inpatient separations Formula: Inpatient deaths - total + inpatient discharges - total + inpatient	Midnight Census	Accuracy dependent on quality of data submitted by health facilities	Not applicable	All Districts	Non - cumulative	Quarterly	Higher	Hospital manager	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
		Inpatient discharges, Inpatient deaths and Inpatient transfers out. Include all specialities			transfers out - total									
x	6.7.6 Inpatient (usable) bed utilisation rates	Inpatient bed days used as proportion of inpatient beds usable- total days (inpatient beds x days in period) available. Include all specialities	Midnight Census, Bed approval letter	Inpatient days + 1/2 Day patients Formula: Inpatient days total x 1 + Day patient total x 0.5	Inpatient beds usable- total bed days available Formula: Inpatient beds usable - total * 30.42	Midnight Census, Bed approval letter	Accuracy dependent on quality of data submitted by health facilities	Not applicable	All Districts	Non - cumulative	Quarterly	Higher	Hospital manager	2
x	6.7.11 Expenditure per PDE	Average cost per patient day equivalent (PDE). PDE is the Inpatient days total + Day Patients *	Accident and Emergency unit (Casualty) and Trauma	Expenditure - total	Patient Day Equivalent – Total Formula:	Accident and Emergency unit (Casualty) and Trauma	Accuracy dependent on quality of data submitted	Not applicable	All Districts	Non-Cumulative	Quarterly	Lower	Hospital manager	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
		0.5 + (Emergency headcount + OPD headcount total) * 0.3333333	unit register, Midnight Census, Management – BAS report, Ambulatory register		Sum ([Inpatient days total x 1])+([Day patient total x 0.5])+([OPD headcount not referred new x 0.3333333])+ SUM([OPD headcount referred new x 0.3333333])+([OPD headcount follow-up x 0.3333333])+([Casualty headcount - Emergency x 0.3333333])+([Casualty headcount - non-emergency x 0.3333333])	unit register, Midnight Census, Management – BAS report, Ambulatory register	by health facilities							
x	1.1.6 Maternal Mortality in facility ratio	Maternal death is death occurring during	Maternal death register (Maternal	Maternal death in facility	Live births known to facility (Live birth in facility plus baby	Maternal death register,	Accuracy dependent on quality of data	Females	All Districts	Non – cumulative	Quarterly	Lower rates	MCWH&N Programme	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
		pregnancy, childbirth and the puerperium of a woman while pregnant or within 42 days of termination of pregnancy, irrespective of the duration and site of pregnancy and irrespective of the cause of death (obstetric and non-obstetric) per 100,000 live births in facility	Morbidity and Mortality Audit System), Birth Register, Labour, Combined and Postnatal ward Health Facility Register, DHIS		born alive before arrival at facility)	Delivery Register	submitted by health facilities							
x	1.3.12 Child under 5 years diarrhoea case fatality rate	Diarrhoea deaths in children under 5 years as a	Paediatric Ward register	Diarrhoea death under 5 years	Diarrhoea separation under 5 years	Paediatric Ward register	Accuracy dependent on quality of data submitted	children	All Districts	Non-Cumulative	Quarterly	Lower rate	MCWH&N Programme	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
		proportion of diarrhoea separations under 5 years in health facilities					by health facilities							
x	1.3.13 Child under 5 years' pneumonia case fatality rate	Pneumonia deaths in children under 5 years as a proportion of pneumonia separations under 5 years in health facilities	Paediatric Ward register	Pneumonia death under 5 years	Pneumonia separation under 5 years	Paediatric Ward register	Accuracy dependent on quality of data submitted by health facilities	children	All Districts	Non-Cumulative	Quarterly	Lower rate	MCWH&N Programme	2
x	1.3.14 Child under 5 years severe acute malnutrition case fatality rate	Severe acute malnutrition deaths in children under 5 years as a proportion of severe acute malnutrition (SAM) under	Paediatric Ward register	Severe acute malnutrition death under 5 years	Severe acute malnutrition inpatient separation under 5 years	Paediatric Ward register	Accuracy dependent on quality of data submitted by health facilities	Children	All Districts	Non-Cumulative	Quarterly	Lower rate	MCWH&N Programme	2

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
		5 years in health facilities												
x	1.3.15 Death under 5 years against live birth rate	Children under 5 years who died during their stay in the facility as a proportion of all live births	Midnight Report	Death in facility under 5 years total Formula: Death in facility 0-6 days + Death in facility 7-28 days + Death in facility 29 days - 11 months + Death in facility 12-59 months	Live birth in facility	Midnight Report	Accuracy dependent on quality of data submitted by health facilities	children	All Districts	Non - cumulative	Quarterly	Lower rates	MCWH&N Programme	2
PROGRAMME 3: EMERGENCY MEDICAL SERVICES														
x	6.5.1 EMS PI urban response under 30 minutes rate	EMS PI calls in urban locations with response times under	EMS Province specific data collections	EMS PI urban response under 30 minutes	EMS PI urban response	EMS Province specific data collections	Accuracy dependent on quality of data from	Not Applicable	All Districts	Non-Cumulative	Quarterly	Higher response rate under 30 min	Programme 3 Manager	3

Provincial Annual Performance Plan 2023/2024 (Standardized Output Indicators)	Indicator Title	Definition	Source of Data	Method of Calculation/Assessment		Means of verification	Assumptions	Disaggregation of Beneficiaries (where applicable)	Spatial Transformation (where applicable)	Calculation Type (Cumulative year-end); cumulative (year-to-date) or non-cumulative	Reporting Cycle	Desired performance	Indicator Responsibility	Budget programme number
				Numerator	Denominator									
		30 minutes as a proportion of EMS PI urban responses	tools CHW daily activity tracker			tools CHW daily activity tracker	reporting EMS station							
x	6.5.2 EMS PI rural response under 60 minutes rate	EMS PI calls in rural locations with response times under 60 minutes as a proportion of EMS PI rural responses	EMS Province specific data collections tools CHW daily activity tracker	EMS PI rural response under 60 minutes	EMS PI rural response	EMS Province specific data collections tools CHW daily activity tracker	Accuracy dependent on quality of data from reporting EMS station	Not Applicable	All Districts	Non-Cumulative	Quarterly	Higher response rate under 60 min	Programme 3 Manager	3
x	6.5.4 Number of Patients transported on the PTV services	Patients transported on the PTV referred to the next level of care	EMS province specific data collection tool.	Number of Patients transported on the PTV services	Not applicable	Logbook	Accuracy dependent of valid on the road PTVs and patients to be transported	Not applicable	All districts	Non - cumulative	Quarterly	Lower	Programme 3 Manager	3
PROGRAMME 4

		have completed capital infrastructure projects.												

ANNEXURES TO THE ANNUAL PERFORMANCE PLAN

Province of the
EASTERN CAPE
HEALTH

ANNEXURE A : AMENDMENT OF STRATEGIC PLAN 2020/21 – 2024/25

The following indicators have been amended.

Table 56: Strategic Plan 2020/21 – 2024/25 Amendment of targets and Outcome Indicators

Outcome	No.	Strategic Plan Outcome Indicators (Original)	No.	Strategic Plan Outcome Indicators (Amendment)	Provincial Five Year Target (2024/ 25)		Reason for amendments
					Old Target	New Target	
1. Maternal, Neonatal, Infant and Child Mortality reduced	1.2	Neonatal death in facility rate	1.2	No indicator change	<10 per 1,000 live births	12/1 000	The amendment is to revise the five year target based on the actual and estimated performance that shows no improvement
3. Morbidity and Premature mortality due to Communicable diseases reduced	3.1	HIV positive 15-24 years (excl. ANC) rate	3.1	No indicator change	1.5%	1.8%	
4. Morbidity and Premature mortality due to non-Communicable diseases reduced	4.4	Mental disorders treatment rate new	4.4	No indicator change	0.3%	0.2%	

ANNEXURE B: CONDITIONAL GRANTS

Table 57: Conditional Grants

Name conditional grant	Purpose of the grant	Outputs	Current Annual Budget (R thousand)	Period of Grant
Human Resource and Training	- To appoint statutory positions in the health sector for systematic realisation of the human resources for health strategy and phased in of National Health Insurance; - Support provinces to fund service cost associated with clinical training and supervision of health science trainee on the public service platform	- Number and percentage of statutory posts funded from this grant (per category and discipline) and other funding sources - Number and percentage of registrar's posts funded from this grant (per discipline) and other funding sources - Number and percentage of specialist's posts funded from this grant (per discipline) and other funding sources - Number and percentage of other health professionals (clinical and allied) appointed (total by district, category and discipline)	581,770	MTEF
District Health Programme Grant	To enable the health sector to develop and implement an effective response to HIV/AIDS Prevention and protection of health workers from exposure to workplace To enable the health sector to develop and implement an effective response to a TB	HIV positive new clients identified and initiated; People living with HIV retained on care; HIV new cases identified and tested (adults and children) TB co-infected positive clients initiated and cured;	3,077,003	MTEF
National Tertiary services	Ensure the provision of tertiary health services in South Africa To compensate tertiary facilities for the additional costs associated with the provision of these services	•Number of inpatient separations •Number of day patient separations •Number of outpatient first attendances •Number of outpatient follow-up attendances •Number of inpatient days •Average length of stay by facility (tertiary) •Bed utilisation rate by facility (all levels of care)	1,255,448	MTEF
Health Facility Revitalization Grant	To help accelerate construction, maintenance, upgrading and rehabilitation of new and existing infrastructure in health including health technology (HT). Organisational design (OD) systems and quality assurance (QA) To enhance capacity to deliver health infrastructure	Health care facilities upgraded, rehabilitated, maintained to provide better access to clients. Quality of care at health care facilities improved Appointment of staff with requisite skills and qualifications to ensure that health infrastructure is delivered properly in line with norms and standards	789,942	MTEF

Name conditional grant	Purpose of the grant	Outputs	Current Annual Budget (R thousand)	Period of Grant
National Health Insurance Grant	To achieve Universal Health Access through the phased implementation of National Health Insurance (NHI) and to improve access to quality health care services.	- No. of District Health Professionals Appointed - No. Mobile healthcare Units Procured - No. of CHC Rehabilitative Sites Commissioned - No. of Dental Service Sites Commissioned - No. of Professional Service groups Contracted - Commissioning of an Oncology Radiotherapy Bunker - No. of Decentralised Chemotherapy Sites Commissioned - No. of Mental Health Service Professionals Appointed	63,501	MTEF
Expanded Public Works Programme - Integrated	To create work opportunities related to Infrastructure Development	Number of people employed and receiving income through the EPWP Increased average duration of the work opportunities created	2,010	2024/25
Expanded Public Works Programme – Social Cluster	To incentivize the provincial Social sector Departments identified in 2015 Social Sector EPWP Log frame to increase job creation by focusing on the strengthening and expansion of social service programmes that have employment potential	- Number of beneficiaries benefiting from the Grant - Increased number of people cracked and traced back to the system - Improved and strengthened referral pathways - Decreased number of people who are lost to follow - Adherence to treatment improved - Improved access to health services	10,720	2024/25

ANNEXURE E: PROCESS FOR DEVELOPING THE 2024/25 ANNUAL PERFORMANCE PLAN (APP)

In preparing for the development of the 2024/25 Annual Performance Plan, the Department conducted an internal and external environment scanning to inform the situation analysis. A strategic planning session was hosted with internal and external stakeholders to ensure that the department addresses appropriate strategic issues of the Department. These sessions included the following: -

- The departmental strategic planning session was held at BCM District Boardroom physically from 04-05 December 2024 to review the departmental five-year Strategic Plan (2020/21- 2024/25) progress. The department collectively reflected on the 2022/23 overall performance with special focus on a number of new mandates, International, National, and Provincial imperatives that the department is implementing and also looking at National and International obligations we are required to implement as a department.
- The Strategic Planning unit conducted the consultation session with programme managers to develop the Draft 2024/25 APP. The draft 2024/25 was updated with 2022/23 actual performance and 2023/24 nine-months' data. The consultation session took place from 13 – 29 February 2024 . The following programme and sub- programme managers were consulted in order to finalise the 2024/25 Annual Performance Plan:
 - ✓ District Health Services: District Management, Clinics, Community Health Centres, Non – Communicable disease –NCD, Health Programmes, MCWH & N, HAST and District Hospitals
 - ✓ Health Care Clinical Support Services
 - ✓ Emergency Medical Services
 - ✓ Provincial Hospital services: Regional, TB Hospitals and Mental Hospitals
 - ✓ Central and Tertiary Hospitals Services
 - ✓ Health Science and Training
 - ✓ Health Facilities Management
- The department hosted a vetting session to allow executive and top management an opportunity to confirm alignment with outcomes of the strategic planning session and final budget allocation including outstanding information in order to finalise the development of 2024/25 APP.

ANNEXURE F:

PROGRAMME OUTPUTS RELATING TO WOMAN, YOUTH AND PEOPLE WITH DISABILITIES

Table 60: Woman, Youth and people with disabilities

Output Indicator	Programme / Sub Programme	Annual Target
Output for Elderly and Children		
Cataract surgery rate	Sub program 2.4	350/1 000 000
Output for women		
IUCD Uptake	Sub program 2.7	2 000
Antenatal 1 st visit before 20 weeks rate	Sub program 2.7	66%
Antenatal client start on ART rate	Sub program 2.7	95%
Delivery in 10 –14 years in facility	Sub program 2.7	335
Maternal mortality in facility ratio	Sub program 2.7	<120/100 000
Live birth under 2500g in facility rate	Sub program 2.7	12%
Mother postnatal visit within 6 days rate	Sub program 2.7	82%
Cervical cancer screening coverage	Sub program 2.7	43%
Output for Children		
Infant PCR test positive around 6 months rate	Subprogram 2.7	<1%
Immunisation under 1 year coverage	Subprogram 2.7	89%
Measles 2 nd dose 1 year coverage	Subprogram 2.7	85%
Death under 5 years against live birth rate	Subprogram 2.7	<2%
Neonatal death in facility rate	Subprogram 2.7	10/1000
Vitamin A dose 12-59-months coverage	Subprogram 2.7	76%
Child under 5 years diarrhoea case fatality rate	Subprogram 2.7	2.5%
Child under 5 years pneumonia case fatality rate	Subprogram 2.7	2.4%
Child under 5 years severe acute malnutrition case fatality rate	Subprogram 2.7	7.5%
Outputs for youth		
Number of students completed the 4 - year comprehensive course	Programme 6	111
Number of EMS Practitioners completed Emergency Care Qualification	Programme 6	9
Number of registrars qualified as specialist	Programme 6	20
Number of bursary students completed training	Programme 6	74
Number of youth placed on youth programs	Programme 6	1350
Outputs for disability		
Wheelchair issued adult 19 years and older rate	Programme 7	60%
Wheelchair issued child 0-18 years rate	Programme 7	100%
Hearing aid issued adult 19 years and older rate	Programme 7	70%
Hearing aid issued child 0-18 years rate	Programme 7	100%

CONCLUSION

This is the Final 2024/25 Annual Performance Plan of the Department, which stands as a proposal to accelerate service delivery towards the achievement of its vision and mission as set out in the 2020/21 – 2024/25 Strategic Plan of the Department. The department is committed to its mantra of “ready; able and capable “- the year of decisive action to advance the people’s health interests.
